

described in the Draft CCP/EA. Any lands within the acquisition boundary of the refuge that have had their forest cover removed prior to 1990, would be targeted for acquisition and reforestation.

The refuge would continue to benefit resident wildlife species and would aim to increase its knowledge base about migratory birds by developing and implementing monitoring programs. It would continue to provide habitats for waterfowl, shorebirds, marsh birds, nesting colonial waterbirds, and landbirds. Resources would be used to create and/or maintain a variety of habitats compatible with historic habitat types of the Red River Valley. These would include the above-mentioned bottomland hardwood forest habitat, as well as moist prairie. Prior farming practices on lands acquired by the refuge have left, in place, a number of water control structures. These water control structures would be maintained and enhanced to control water levels on several thousand acres of refuge lands. Efforts to control invasive species would increase.

Land acquisition, reforestation, and resource protection would be intensified from the level now maintained in the No Action Alternative. The refuge would expand the approved acquisition boundary to incorporate 1,413 acres in the Spanish Lake Lowlands Unit, 87 acres in the Headquarters Unit, and 1,938 acres in the Lower Cane Unit. In the refuge's Private Lands Program, staff would work with private landowners on adjacent tracts to manage and improve habitats. The refuge would develop and begin to implement a Cultural Resources Management Plan (CRMP). Until such time as the CRMP is completed and implemented, the refuge would follow standard Service protocol and procedures in conducting cultural resource surveys by qualified professionals as needed.

Wildlife-dependent visitor services would increase under this alternative. Within three years of CCP completion, the refuge would develop a Visitor Services' Plan to be used in expanding public use facilities and opportunities on the refuge. This step-down management plan would provide overall, long-term direction and guidance in developing and running a larger public use program at Red River Refuge. Federal funds are now available to construct a Refuge Headquarters/ Visitor Center at the Headquarters Unit. The new visitor center would include a small auditorium for use in talks, meetings, films, videos, and other audio-visual presentations. Alternative C would also increase opportunities for

visitors by adding facilities such as photo-blinds, observation sites, and trails. Over the 15-year life of the CCP, more emphasis would be placed on environmental education and interpretation to increase the public's understanding of the importance of habitats and resources of the Red River Valley. Within five years of CCP approval, the refuge would prepare a Fishing Plan that would outline and expand permissible fishing opportunities within the refuge. A fishing pier would be constructed at the Headquarters Unit. Staff would investigate opportunities for expanding hunting possibilities.

Alternative C would provide an assistant manager, a full-time law enforcement officer, an equipment operator, a maintenance worker, a wildlife biologist, an administrative assistant, and an outdoor recreational specialist.
