

later decision.¹ Our issuing this notice now does not constitute a determination as to whether DOE's application is complete or otherwise prejudice the State's motion. We will modify the schedule, if necessary, as a result of our subsequent ruling on the State's motion.

The environmental review related to the proposed construction and operation of a rail line to Yucca Mountain began in 2004 and is well underway. In 2004, the Board accepted DOE's invitation to participate as a "cooperating agency" under the President's Council on Environmental Quality regulations at 40 CFR 1501.6 to give DOE the benefit of the Board's expertise in freight rail transportation in the preparation of Environmental Impact Statements (EISs) addressing a potential Nevada rail transportation corridor and alternative rail alignments. DOE was also aware when it asked the Board to become a cooperating agency that the Board would have jurisdiction over the proposed new rail line in the event DOE were to decide to have the proposed line operated as a common carrier rail line. (The cooperating agency process is intended to make environmental review under NEPA more efficient by giving all agencies with licensing authority over a project the environmental information they need to comply with NEPA and related environmental laws in undertaking their decisionmaking.)

The Board's Section of Environmental Analysis (SEA) and the other cooperating agencies on the Nevada rail corridor and rail alignment EISs (the Bureau of Land Management and United States Air Force) have participated in every step of the EIS process. The Draft EISs were issued for public review and comment in October 2007 in *Draft Environmental Impact Statement for a Rail Alignment for the Construction and Operation of a Railroad in Nevada to a Geologic Repository at Yucca Mountain, Nye County, Nevada* (DOE/EIS-03691) and in *Draft Environmental Impact Statement for a Geologic Repository for the Disposal of Spent Nuclear Fuel and High-Level Radioactive Waste at Yucca Mountain, Nye County, Nevada—Nevada Rail Transportation Corridor* (DOE/EIS-0250F-S2D). DOE has made electronic copies of the Draft EISs addressing the Nevada rail corridor and alternative rail alignments available at <http://www.ocrwm.doe.gov>.

SEA participated in the public hearings that were held on the Draft

EISs in November and December 2007. Following the close of the comment period in January 2008, preparation of Final EISs addressing the Nevada rail corridor and alternative rail alignments began. DOE estimates that it will issue the Final EISs in June 2008. The EISs (including the public comments) will serve as the basis for SEA's recommendations to the Board regarding whether, from an environmental perspective, DOE's construction and operation application should be granted, denied, or granted with environmental conditions.

The Board has not participated in the ongoing EIS process for the proposed geologic repository that the proposed new line would serve.

The Board will take into consideration both the transportation merits and the environmental impacts of constructing and operating the proposed line when ruling on DOE's application.

This decision will not significantly affect either the quality of the human environment or the conservation of energy resources.
