

affect the species or stock through effects on annual rates of recruitment or survival.

With respect to military readiness activities, the MMPA defines "harassment" as:

(i) any act that injures or has the significant potential to injure a marine mammal or marine mammal stock in the wild [Level A Harassment]; or (ii) any act that disturbs or is likely to disturb a marine mammal or marine mammal stock in the wild by causing disruption of natural behavioral patterns, including, but not limited to, migration, surfacing, nursing, breeding, feeding, or sheltering, to a point where such behavioral patterns are abandoned or significantly altered [Level B Harassment].

Summary of Request

On March 31, 2008, NMFS received an application from the Navy requesting authorization for the take of 24 species of marine mammals (4 pinniped and 20 cetacean) incidental to upcoming training activities to be conducted off the coast of southern California and farther off the coast of northern Mexico (in SOCAL) over the course of 5 years. These training activities are classified as military readiness activities. The Navy states that these training activities may expose some of the marine mammals present in the area to sound from various mid-frequency and high-frequency active tactical sonar sources or to pressure from underwater detonations. The Navy requests authorization to take individuals of 24 species of marine mammals by Level B Harassment. Further, the Navy requests authorization to take 10 individual beaked whales over the course of 5 years by serious injury or mortality.

Specified Activities

In the application submitted to NMFS, the Navy requests authorization to take marine mammals incidental to conducting operations utilizing mid- and high frequency active sonar sources and explosive detonations. These sonar and explosive sources will be utilized during Naval Surface Fire Support Exercises, Bombing Exercises, Sink Exercises, Antisubmarine Warfare (ASW) Tracking Exercises, ASW Torpedo Exercises, Major Integrated ASW Training Exercises, and Mine Neutralization Exercises. Table 1-1 in the application lists the activity types, the equipment and platforms involved, and the duration and potential locations of the activities.

Information Solicited

Interested persons may submit information, suggestions, and comments concerning the Navy's request (see ADDRESSES). All information, suggestions, and comments related to

the Navy's SOCAL request and NMFS' potential development and implementation of regulations governing the incidental taking of marine mammals by the Navy's SOCAL activities will be considered by NMFS in developing, if appropriate, the most effective regulations governing the issuance of letters of authorization.
