

obtain written consent of involved DTV station licensee(s).

47 CFR Section 74.790(g) requires a digital LPTV station who transmits the programming of a TV broadcast or DTV broadcast station receive prior written consent of the station whose signal is being transmitted.

47 CFR Section 74.794 mandates that digital LPTV and TV translator stations operating on TV channels 22–24, 32–36, 38, and 65–69 with a digital transmitter not specifically FCC-certificated for the channel purchase and utilize a low pass filter or equivalent device rated by its manufacturer to have an attenuation of at least 85 dB in the GPS band. The licensees must retain with their station license a description of the low pass filter or equivalent device with the manufacturer's rating or a report of measurements by a qualified individual.

47 CFR Section 74.796(b)(5) requires digital LPTV or TV translator station licensees that modify their existing transmitter by use of a manufacturer-provided modification kit would need to purchase the kit and must notify the Commission upon completion of the transmitter modifications, in addition, a digital LPTV or TV translator station licensees that modify their existing transmitter and do not use a manufacturer-provided modification kit, but instead perform custom modification (those not related to installation of manufacturer-supplied and FCC-certified equipment) must notify the Commission upon completion of the transmitter modifications and shall certify compliance with all applicable transmission system requirements.

47 CFR Section 74.796(b)(6) provides that operators who modify their existing transmitter by use of a manufacturer-provided modification kit must maintain with the station's records for a period of not less than two years, and will make available to the Commission upon request, a description of the nature of the modifications, installation and test instructions, and other material provided by the manufacturer, the results of performance-tests and measurements on the modified transmitter, and copies of related correspondence with the Commission. In addition, digital LPTV and TV translator operators who custom modify their transmitter must maintain with the station's records for a period of not less than two years, and will make available to the Commission upon request, a description of the modifications performed and performance tests, the results of performance-tests and measurements on the modified

transmitter, and copies of related correspondence with the Commission.

In situations where protection of an existing analog LPTV or translator station without a frequency offset prevents acceptance of a proposed new or modified LPTV, TV translator, or Class A station, the Commission requires that the existing non-offset station install at its expense offset equipment and notify the Commission that it has done so, or, alternatively, negotiate an interference agreement with the new station and notify the Commission of that agreement.

The Commission requires that wireless licensees operating on channels 52–59 and 60–69 notify (by certified mail, return receipt requested) a digital LPTV or TV translator licensee operating on the same channel of first adjacent channel of its intention to initiate or change wireless operations and the likelihood of interference from the LPTV or translator station within its licensed geographic service area. This notification should describe the facilities, associated service area, and operation of the wireless licensee with sufficient detail to permit an evaluation of the likelihood of interference.

SUPPLEMENTARY INFORMATION: In *Review of the Commission's Broadcast and Cable Equal Opportunity Rules and Policies*, Third Report and Order and

Fourth Notice of Proposed Rulemaking, 69 FR 34950, June 23, 2004 (19 FCC Rcd 9973 (2004)), the Commission stated that FCC Forms 395-A and 395-B conformed to the racial and employment categories contained in the then-existing Form EEO-1 Employer Information Report issued by the Equal Employment Opportunity Commission ("EEOC"). It noted that the EEOC had proposed to revise its EEO-1 form to incorporate new racial and employment categories adopted by the Office of Management and Budget ("OMB"), and that, when the revised EEO-1 form was released, the Commission would review its forms to see what changes were needed to comply with the new OMB standards, and whether it could so conform those forms to those standards consistent with Sections 334 and 634 of the Communications Act of 1934, as amended (the "Act"). With the EEOC's release of the revised EEO-1 form incorporating revised racial and employment categories, the Media Bureau has conducted that review, and hereby seeks public comment on whether it should so incorporate the EEOC revised standards and whether such changes are consistent with Sections 334 and 634 of the Act. The revised EEO-1 form, which specifies these categories at Section D, and the Instruction Booklet to the form, which contains the definition of each such category, are attached to the Commission's Public Notice, which can be accessed at <http://www.fcc.gov/mb/policy/eo>.
