SUPPLEMENTARY INFORMATION: NOAA is publishing this notice to announce the availability of the draft NOAA Hurricane Forecasting Improvement Project Plan for public comment. The NOAA is seeking public comment from all interested parties. The NOAA Hurricane Forecasting Improvement Project Plan draft is being issued for comment only and is not intended for interim use. Suggested changes will be incorporated where appropriate, and the final document will be posted on a NOAA Web site.

The NOAA Hurricane Forecasting Improvement Project Plan is being developed to reflect the evolution of NOAA's research activities and priorities. The draft NOAA Hurricane Forecasting Improvement Project Plan is consistent with the NOAA Science Advisory Board, Hurricane Intensity Research Working Group recommendations and other recent internal and external reports on hurricanes.

The draft NOAA Hurricane Forecasting Improvement Project Plan frames research in NOAA within the context of societal needs and by working with other government and academic organizations working on critical environmental challenges, particularly those associated with hurricanes, facing the United States

today and in the future. This plan states NOAA's priority research areas, such as Hurricane Intensity forecast improvements, improvements in high performance computing, use of new data, for the short term and the milestones by which NOAA intends to measure progress within these areas. Significant topics addressed in the NOAA Hurricane Forecasting Improvement Project Plan include the importance of transition of research to application, the recognition of the value of transformational research, and the engagement and alignment of inter-agency and the larger scientific community efforts toward finding solutions to the challenges posed to improve hurricane forecasts.

NOAA welcomes all comments on the content of the draft NOAA Hurricane Forecasting Improvement Project Plan. We also request comments on any inconsistencies perceived within the document and possible omissions of important topics or issues. For any shortcoming noted within the draft document, please propose specific remedies.

Please follow these instructions for preparing and submitting comments. Using the format guidance described below will facilitate the processing of reviewer comments and assure that all comments are appropriately considered. Overview comments should be provided first. Marine Mammals; File No. 774-1714

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of permit amendment.

SUMMARY: Notice is hereby given that NMFS, Southwest Fisheries Science Center (SWFSC) (Jeremy Rusin,

Principal Investigator), Protected Resources Division, 8604 La Jolla Shores Dr., La Jolla, CA 92037 has been issued an amendment to scientific research Permit No. 774-1714-06.

ADDRESSES: The amendment and related documents are available for review upon written request or by appointment in the following offices: See **SUPPLEMENTARY INFORMATION.**

FOR FURTHER INFORMATION CONTACT:

Amy Hapeman or Carrie Hubard, (301)713-2289.

SUPPLEMENTARY INFORMATION: On March 12, 2007, notice was published in the **Federal Register** (72 FR 10986) that an amendment of Permit No. 774-1714, issued June 30, 2004 (68 FR 57673), had been requested by the above-named organization. The requested amendment has been granted under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR 222-226).

Permit No. 774-1714-07 authorizes the SWFSC to conduct research on seven pinniped species, 55 cetacean species, and five sea turtle species in the Pacific, Indian, Atlantic, Arctic and Southern Oceans. The permit authorizes Level B harassment during aerial and vessel surveys for photo-identification/photogrammetry, incidental harassment, collection of sloughed skin, and salvage of carcasses and parts; Level A harassment for capture, biopsy sampling, and tagging activities; and the import/export of specimens. This amendment: (1) reorganizes the take table to reflect annual takes instead of 5-year cumulative takes; (2) increases the number of animals harassed during aerial and vessel surveys, biopsy sampled, and/or tagged for several cetacean species; (3) collapses authorized takes of six cetacean stocks to the species level; (4) adds Antarctic minke whales (*Balaenoptera bonaerensis*) to species that may be harassed during aerial and vessel surveys for photo-id and biopsy sampled; (5) adds four new cetacean categories for animals that are observed but not identifiable during surveys; (6) adds 14 cetacean species/stocks to those that may be harassed/sampled in the Southern Ocean; and (7) authorizes the satellite tagging of 50 non-endangered killer whales (*Orcinus orca*) in Antarctic

waters annually. The amended permit is valid until it expires on June 30, 2009.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an environmental assessment was prepared analyzing the effects of the permitted activities. After a Finding of No Significant Impact, the determination was made that it was not necessary to prepare an environmental impact statement.

Issuance of this permit, as required by the ESA, was based on a finding that such permit: (1) was applied for in good faith; (2) will not operate to the disadvantage of such endangered species; and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.
