

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–1116.

Title: Submarine Cable Reporting.

Form Nos.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit.

Number of Respondents: 25 respondents; 50 responses.

Estimated Time Per Response: 550 hours.

Frequency of Response: On occasion and annual reporting requirements.

Obligation to Respond: Voluntary.

Total Annual Burden: 27,500 hours.

Total Annual Cost: N/A.

Privacy Act Impact Assessment: N/A.

Nature and Extent of Confidentiality:

Information provided pursuant to this request will be viewed as presumptively confidential upon submission because the information would reflect reports on weaknesses in or damage to national communications infrastructure, and the release of this sensitive information to the public could potentially facilitate terrorist targeting of critical infrastructure and key resources. The submissions also may contain internal confidential information that constitutes trade secrets and commercial/financial information that the respondent does not routinely make public and public release of the submitted information could cause competitive harm by revealing information about the types and deployment of cable equipment and the traffic that flows across the system.

Needs and Uses: The Commission received emergency OMB approval for this information collection on April 16, 2008. Emergency OMB approval is only granted for six months. Therefore, Commission will submit this information collection to the OMB after this 60 day comment period as an extension (no change in reporting requirements) to obtain the full three-year clearance from them. There is no change in the estimated burden.

The Commission is requesting that current submarine cable landing licensees voluntarily provide information regarding the system status and service restoration activities for the submarine cable systems and cable landing stations and information about the physical location, assets, and restoration plans for the submarine cable systems. There are currently 50 authorized submarine cable systems, many having multiple entities on the cable landing license. (There are four pending cable landing license applications, and we anticipate conditioning grant of those licenses on compliance with this information request.) The Commission expects to request this information from

approximately 25 different entities because, in many cases, the same entity is a licensee for more than one submarine cable system. We planned on contacting the cable landing licensees as soon as we received emergency OMB approval for this information request, and will request that the licensees respond, at least on a preliminary basis, by May 1, 2008. This information is needed in order to support Federal government national security and emergency preparedness communications programs, for the purpose of providing situational awareness of submarine cable system performance as well as a greater understanding of potential physical threats to the submarine cable systems. The Commission has been working with the Assistant Director for National Security and Emergency Preparedness, at the Office of Science and Technology Policy (OSTP) on this collection on behalf of other Executive Branch agencies, at the direction of the President.

Federal Communications Commission.

Secretary.
