

certifications to qualify them as AMPs or RSOs. Many board certified individuals were working as medical physicists and in radiation safety positions when the T&E requirements were revised but were not named as the authorized individuals on the NRC or Agreement State licenses and, therefore, were not grandfathered under 10 CFR 35.57. These individuals, under the current regulations, may now have to use the alternate pathway option to demonstrate that they meet the T&E requirements in Part 35.

Under the current 10 CFR Part 35 requirements, two individuals, one listed on an NRC or Agreement State license or permit prior to October 25, 2005, and one who was not, with identical certifications, are treated differently. The individual listed on the license is not required to comply with the T&E requirements in Part 35 and the individual not listed must meet the T&E requirements.

In conclusion, the NRC has determined that the petitioner raised a valid concern regarding the impact of the revisions to the T&E requirements in 10 CFR Part 35. Although in the rulemaking process the NRC staff would need more data than was presented in the petition, sufficient information was presented for the NRC to conduct a review and to determine that the petitioner's concern may warrant relief for certain individuals. Therefore, in resolving the petition, the NRC concluded that the issues raised in the petition will be considered in the rulemaking process in the following way. The NRC will attempt to develop a technical basis to support a rulemaking that would address the issues raised in the petition. If a technical basis which supports rulemaking can be developed, the issues will be addressed in a future rulemaking. If a technical basis to support a rulemaking cannot be developed, the issues will not be further considered by the NRC.

Dated at Rockville, Maryland, this 30th day of April, 2008.
