

Programs, (7506P), Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; telephone number: 703-308-9072; fax number: 703-305-5884; e-mail address: hogue.joe@epa.gov.

SUPPLEMENTARY INFORMATION: EPA has submitted the following ICR to OMB for review and approval according to the procedures prescribed in 5 CFR 1320.12. On November 16, 2007 (72 FR 64611), EPA sought comments on this ICR pursuant to 5 CFR 1320.8(d). EPA received no comments. Any additional comments on this ICR should be submitted to EPA and OMB within 30 days of this notice.

EPA has established a public docket for this ICR under Docket ID No. EPA-HQ-OPP-2007-0299, which is available for online viewing at <http://www.regulations.gov>, or in person

viewing at the OPP Regulatory Public Docket in Rm. S-4400, One Potomac Yard (South Building), 2777 S. Crystal Drive, Arlington, VA. This docket facility is open from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The docket telephone number is (703) 305-5805.

Use EPA's electronic docket and comment system at <http://www.regulations.gov>, to submit or view public comments, access the index listing of the contents of the docket, and to access those documents in the docket that are available electronically. Once in the system, select "docket search," then key in the docket ID number identified above. Please note that EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing at <http://www.regulations.gov> as EPA receives them and without change, unless the comment contains copyrighted material, Confidential Business Information (CBI), or other information whose public disclosure is restricted by statute. For further information about the electronic docket, go to <http://www.regulations.gov>.

Title: Worker Protection Standard Training and Notification.

ICR numbers: EPA ICR No. 1759.05, OMB Control No. 2070-0148.

ICR Status: This ICR is scheduled to expire on May 31, 2008. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after

appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: EPA is responsible for the regulation of pesticides under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). The Worker Protection Standard (WPS), codified at 40 Code of Federal Regulations (CFR) part 170, established requirements to protect agricultural workers and pesticide handlers from hazards of pesticides used on farms, on forests, in nurseries and in greenhouses. 40 CFR part 170 contains the standard and workplace practices, which are designed to reduce or eliminate exposure to pesticides and establish procedures for responding to exposure-related emergencies. The practices include prohibitions against applying pesticides in a way that would cause exposure to workers and others; a waiting period before workers can return to areas treated with pesticides (restricted entry interval); basic safety training (and voluntary training verification) and posting of information about pesticide hazards, as well as pesticide application information; arrangements for the supply of soap, water, and towels in case of pesticide exposure; and provisions for emergency assistance. The training verification program facilitates compliance with the training requirements by providing a voluntary method for employers to verify that the required safety information has been provided to workers and handlers.

This renewal ICR estimates the third party response burden from complying with the Worker Protection Standard requirements. Information is exchanged between agricultural employers and employees at farm, forest, nursery and greenhouse establishments to ensure worker safety. No information is collected by the Agency under this ICR. Responses to this ICR are mandatory. The authority for this information collection is provided under section 25 of FIFRA and 40 CFR part 170.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 0.15 hours (about 9 minutes) per response, ranging from two minutes to 45 minutes for the various types of responses. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal

agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Agricultural employers, including employers in farms as well as nursery, forestry, and greenhouse establishments.

Estimated Number of Respondents: 3,245,393.

Frequency of Response: On occasion.

Estimated Total Annual Hour Burden: 1,776,131

Estimated Total Annual Cost: \$76,574,607, includes \$0 annualized capital or O&M costs.

Changes in the Estimates: The total estimated annual respondent burden for this ICR renewal is 1,776,131 hours, a reduction of 517,233 from the 2,293,364 total estimated burden hours in the currently-approved ICR. This change is an adjustment and is the result of a correction to the estimated annual number of treatment-specific worker and handler notification events, both oral and posted. Although EPA had correctly explained the method of calculating the number of notifications in previous versions of this ICR, the figures presented in the supporting statement's corresponding tables that were used to tally the overall burden were inconsistent with EPA's explanation. EPA has clarified its explanation in the supporting statement.

Dated: May 9, 2008.

Sara Hisel-McCoy,

Director, Collection Strategies Division.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[FRL-8567-8]

Office of Research and Development; Ambient Air Monitoring Reference and Equivalent Methods: Designation of a New Reference Method

AGENCY: Environmental Protection Agency.

ACTION: Notice of the designation of a new reference method for monitoring ambient air quality.

SUMMARY: Notice is hereby given that the Environmental Protection Agency (EPA) has designated, in accordance with 40 CFR part 53, on a new reference method for measuring concentrations of nitrogen dioxide (NO₂) in the ambient air.

FOR FURTHER INFORMATION CONTACT: Elizabeth Hunike, Human Exposure and Atmospheric Sciences Division (MD-D205-03), National Exposure Research Laboratory, U.S. EPA, Research Triangle Park, North Carolina 27711. Phone: (919) 541-3737, e-mail: Hunike.Elizabeth@epa.gov.

SUPPLEMENTARY INFORMATION: In accordance with regulations at 40 CFR part 53, the EPA evaluates various methods for monitoring the concentrations of those ambient air pollutants for which EPA has established National Ambient Air Quality Standards (NAAQSs) as set forth in 40 CFR part 50. Monitoring methods that are determined to meet specific requirements for adequacy are designated by the EPA as either reference methods or equivalent methods (as applicable), thereby permitting their use under 40 CFR part 58 by States and other agencies for determining attainment of the NAAQSs.

The EPA hereby announces the designation of a new reference method for measuring concentrations of NO₂ in the ambient air. This designation is made under the provisions of 40 CFR part 53, as amended on December 18, 2006 (71 FR 61271).

The new reference method for NO₂ is an automated method (analyzer) that utilizes the measurement principle (gas phase chemiluminescence) and the calibration procedure specified in Appendix F of 40 CFR part 50. The newly designated NO₂ reference method is identified as follows:

RFNA-0508-171, "DKK-TOA Corporation Model GLN-314E Nitrogen Oxides Analyzer," operated at any temperature in the range of 20 °C to 30 °C, on any of the following measurement ranges: 0-0.100 ppm, 0-0.200 ppm, 0-0.500 ppm.

An application for a reference method determination for the candidate method was received by the EPA on December 13, 2007. The sampler is commercially available from the applicant, DKK-TOA Corporation, 29-10, 1-Chome, Takadanobaba, Shinjuku-ku, Tokyo 169-8648, Japan (<http://www.toadkk.co.jp>).

A test analyzer representative of this method has been tested in accordance

with the applicable test procedures specified in 40 CFR part 53 (as amended on December 18, 2006). After reviewing the results of those tests and other information submitted by the applicant in the application, EPA has determined, in accordance with part 53, that this method should be designated as a reference method. The information submitted by the applicant in the application will be kept on file, either at EPA's National Exposure Research Laboratory, Research Triangle Park, North Carolina 27711 or in an approved archive storage facility, and will be available for inspection (with advance notice) to the extent consistent with 40 CFR part 2 (EPA's regulations implementing the Freedom of Information Act).

As a designated reference method, this method is acceptable for use by states and other air monitoring agencies under the requirements of 40 CFR part 58, Ambient Air Quality Surveillance. For such purposes, the method must be used in strict accordance with the operation or instruction manual associated with the method and subject to any specifications and limitations (e.g., configuration or operational settings) specified in the applicable designation method description (see the identifications of the method above).

Use of the method should also be in general accordance with the guidance and recommendations of applicable sections of the "Quality Assurance Handbook for Air Pollution Measurement Systems, Volume I," EPA/600/R-94/038a and "Quality Assurance Handbook for Air Pollution Measurement Systems, Volume II, part 1," EPA-454/R-98-004 (available at <http://www.epa.gov/ttn/amtic/qabook.html>). Vendor modifications of a designated reference method used for purposes of part 58 are permitted only with prior approval of the EPA, as provided in part 53. Provisions concerning modification of such methods by users are specified under Section 2.8 (Modifications of Methods by Users) of Appendix C to 40 CFR part 58.

In general, a method designation applies to any sampler or analyzer which is identical to the sampler or analyzer described in the application for designation. In some cases, similar samplers or analyzers manufactured prior to the designation may be upgraded or converted (e.g., by minor modification or by substitution of the approved operation or instruction manual) so as to be identical to the designated method and thus achieve designated status. The manufacturer should be consulted to determine the

feasibility of such upgrading or conversion.

Part 53 requires that sellers of designated reference or equivalent method analyzers or samplers comply with certain conditions. These conditions are specified in 40 CFR 53.9 and are summarized below:

(a) A copy of the approved operation or instruction manual must accompany the sampler or analyzer when it is delivered to the ultimate purchaser.

(b) The sampler or analyzer must not generate any unreasonable hazard to operators or to the environment.

(c) The sampler or analyzer must function within the limits of the applicable performance specifications given in 40 CFR parts 50 and 53 for at least one year after delivery when maintained and operated in accordance with the operation or instruction manual.

(d) Any sampler or analyzer offered for sale as part of a reference or equivalent method must bear a label or sticker indicating that it has been designated as part of a reference or equivalent method in accordance with part 53 and showing its designated method identification number.

(e) If such an analyzer has two or more selectable ranges, the label or sticker must be placed in close proximity to the range selector and indicate which range or ranges have been included in the reference or equivalent method designation.

(f) An applicant who offers samplers or analyzers for sale as part of a reference or equivalent method is required to maintain a list of ultimate purchasers of such samplers or analyzers and to notify them within 30 days if a reference or equivalent method designation applicable to the method has been canceled or if adjustment of the sampler or analyzer is necessary under 40 CFR 53.11(b) to avoid a cancellation.

(g) An applicant who modifies a sampler or analyzer previously designated as part of a reference or equivalent method is not permitted to sell the sampler or analyzer (as modified) as part of a reference or equivalent method (although it may be sold without such representation), nor to attach a designation label or sticker to the sampler or analyzer (as modified) under the provisions described above, until the applicant has received notice under 40 CFR part 53.14(c) that the original designation or a new designation applies to the method as modified, or until the applicant has applied for and received notice under 40 CFR 53.8(b) of a new reference or

equivalent method determination for the sampler or analyzer as modified.

Aside from occasional breakdowns or malfunctions, consistent or repeated noncompliance with any of these conditions should be reported to: Director, Human Exposure and Atmospheric Sciences Division (MD-E205-01), National Exposure Research Laboratory, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

Designation of this new reference method is intended to assist the States in establishing and operating their air quality surveillance systems under 40 CFR part 58. Questions concerning the commercial availability or technical aspects of the method should be directed to the applicant.

Jewel F. Morris,

Acting Director, National Exposure Research Laboratory.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[FRL-8567-3]

Meeting of the Local Government Advisory Committee

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: The Local Government Advisory Committee (LGAC) and the Small Community Advisory Subcommittee (SCAS) will meet on June 11-12th, 2008 in Seattle, Washington. The Committee and Subcommittee will be meet at The Red Lion Hotel, located at 1415 5th Avenue, Seattle, WA. The focus areas of the meeting(s) will be: climate change, green buildings, watersheds and coastline issues, small communities issues, military issues, and other environmental issues potentially affecting local governments.

This is an open meeting and all interested persons are invited to attend. The Committee will hear comments from the public between 11:30 a.m. and 12 p.m. on Wednesday, June 11, 2008. Each individual or organization wishing to address the LGAC meeting will be allowed a maximum of five minutes to present their point of view. Also, written comments may be submitted electronically to

Eargle.Frances@epa.gov. Please contact the Designated Federal Officer (DFO) at the number listed below to schedule agenda time. Time will be allotted on a first come, first serve basis, and the total

period for comments may be extended, if the number of requests for appearances require it.

ADDRESSES: The LGAC meeting will be held at The Red Lions Hotel, located at 1415 5th Avenue, June 11-12.

The Committee's and Subcommittee's Meeting Summaries will be available after the meeting online at <http://www.epa.gov/ocir/scas> and can be obtained by written request to the DFO.

FOR FURTHER INFORMATION CONTACT:

Frances Eargle, DFO for the Local Government Advisory Committee (LGAC), at (202) 564-3115 or e-mail at *Eargle.Frances@epa.gov*. For those interested in participating in the Small Community Subcommittee meeting, contact Javier Araujo at (202) 564-2642 or by e-mail at *Araujo.Javier@epa.gov*.

Information on Services for Those With Disabilities: For information on access or services for individuals with disabilities, please contact Frances Eargle at (202) 564-3115 or *Eargle.Frances@epa.gov*. To request accommodation of a disability, please request it 10 days prior to the meeting, to give EPA as much time as possible to process your request.

Dated: May 8, 2008.

M. Frances Eargle,

Designated Federal Officer, Local Government Advisory Committee.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[FRL-8567-6]

Meeting of the National Drinking Water Advisory Council—Notice of Public Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Under Section 10(a)(2) of Public Law 92-423, "The Federal Advisory Committee Act," notice is hereby given of a meeting of the National Drinking Water Advisory Council (NDWAC), established under the Safe Drinking Water Act, as amended (42 U.S.C. 300f *et seq.*). The Council will consider various issues associated with drinking water and adaptation to climate change, including information about the EPA Office of Water's draft National Water Program Strategy: Response to Climate Change. The Council will receive updates about several on-going projects including the third Contaminant Candidate List, the Aircraft Drinking Water Rule, and the

Total Coliform Rule/Distribution System Federal Advisory Committee. EPA will also consult with the Council on the upcoming rule-making for the geologic sequestration of carbon dioxide.

DATES: The Council meeting will be held on June 3, 2008, from 8:30 a.m. to 5:30 p.m., and June 4, 2008, from 8:30 a.m. to noon, Mountain time.

ADDRESSES: The meeting will be held in Tucson, Arizona. Information about the location will be made available in the near future on EPA's Web site at <http://www.epa.gov/safewater/ndwac/>.

FOR FURTHER INFORMATION CONTACT:

Members of the public who would like to attend the meeting, present an oral statement, or submit a written statement, should contact Veronica Blette, by e-mail at: *bllette.veronica@epa.gov*, by phone, 202-564-4094, or by regular mail at the U.S. Environmental Protection Agency, Office of Ground Water and Drinking Water (MC 4601M), 1200 Pennsylvania Avenue, NW., Washington, DC 20460.

SUPPLEMENTARY INFORMATION: The meeting is open to the public. The Council encourages the public's input and will allocate one hour (3:30 p.m.–4:30 p.m.) on June 3, 2008, for this purpose. Oral statements will be limited to five minutes. It is preferred that only one person present the statement on behalf of a group or organization. To ensure adequate time for public involvement, individuals or organizations interested in presenting an oral statement should notify Veronica Blette by telephone at 202-564-4094 no later than May 23, 2008. Any person who wishes to file a written statement can do so before or after a Council meeting. Written statements received by May 23, 2008, will be distributed to all members of the Council before any final discussion or vote is completed. Any statements received after May 23, 2008, will become part of the permanent meeting file and will be forwarded to the Council members for their information.

Special Accommodations

For information on access or services for individuals with disabilities, please contact Veronica Blette at 202-564-4094 or by e-mail at *bllette.veronica@epa.gov*. To request accommodation of a disability, please contact Veronica Blette, preferably at least 10 days prior to the meeting to give EPA as much time as possible to process your request.
