Disallowing Management Fees in EPA Assistance Agreements

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The term "management fees or similar charges" refers to expenses added to the direct costs in order to accumulate and reserve funds for ongoing business expenses, unforeseen liabilities, or for other similar costs which are not allowable under EPA assistance agreements. EPA will not, as a matter of policy, allow recipients of EPA financial assistance to charge management fees to their agreements with the Agency. Recipients will have actual notice of EPA's policy prohibiting management fees through a term and condition and competitive solicitation announcements.

EPA funds for financial assistance are limited. The Agency has decided that, in the absence of contrary statutory direction, the public's interest in supporting projects that promote environmental protection is best served by ensuring that EPA financial assistance is used only to pay for costs that are allocable to the specific project receiving EPA financial assistance, and are reasonable and necessary for the performance of the project. Management fees or similar charges may not be used to improve or expand the capacity of organizations carrying out EPA funded projects, except to the extent authorized by the terms of the agreement as a direct cost of carrying out the scope of work. EPA's "no management fee" policy is consistent with OMB Circular A-122, as codified at 2 CFR Part 230. According to 2 CFR Part 230, Appendix B, Item 9, contributions to contingency reserves for unforeseen events are unallowable. Therefore, management fees or similar charges in excess of the direct costs and approved indirect rates are not

allowable under EPA assistance agreements.

SUPPLEMENTARY INFORMATION:

I. Summary of Information About the Integrated Risk Information System (IRIS)

IRIS is a database that contains potential adverse human health effects information that may result from chronic (or lifetime) exposure to specific chemical substances found in the environment. The database (available on the Internet at <http://www.epa.gov/iris>) contains qualitative and quantitative health effects information for more than 540 chemical substances that may be used to support the first two steps (hazard identification and dose-response evaluation) of a risk assessment process. When supported by available data, the database provides oral reference doses (RfDs) and inhalation reference concentrations (RfCs) for chronic health effects, and oral slope factors and inhalation unit risks for carcinogenic effects. Combined with specific exposure information,

government and private entities can use IRIS data to help characterize public health risks of chemical substances in a site-specific situation and thereby support risk management decisions designed to protect public health.
