

periodically conducts surveys of samples of Federal employees on a variety of topics. To obtain insight into the perspectives of management and management advisors regarding Federal disciplinary processes, MSPB is requesting OMB approval to conduct surveys of two groups. All surveys will be completed within two years.

MSPB originally proposed sending surveys to (1) proposing officials for discipline, (2) deciding officials for discipline, and (3) human resources advisors on disciplinary actions. However, as discussed below, MSPB has determined that a survey for human resources advisors for this topic will not be an efficient use of resources. The surveys of proposing and deciding officials will ask respondents to share their experiences conducting suspensions of 14 days or less and removal actions, including their level of involvement in decisions made, their use of alternative discipline, the nature of the conduct that led to the action, the role of performance in conduct based actions, and the quality of related training they received. Respondents will be selected based upon disciplinary and adverse actions recorded in the Central Personnel Data File (CPDF).

The single commenter recommended that the MSPB include a survey of agency legal counselors, as these individuals interact with proposing officials, deciding officials, and human resources advisors. We agree that agency legal advisors may frequently play an important role in the process of disciplining employees. Human resources advisors also play an important role. For this reason, both the proposing and deciding official surveys will include questions regarding the respondent's interactions with human resources as well as interactions with a legal advisor when such an advisor was used. However, as the focus of this study is the experience of the proposing and deciding officials, we have determined that surveying human resources and legal advisors would not be an optimal use of resources. In past studies on similar topics, such as agencies' use of the probationary period, the MSPB has used focus groups of human resources specialists to obtain additional insight into management activities beyond that provided by the supervisors who respond to the survey. If MSPB determines it is warranted for this study, one or more focus groups of human resources specialists, attorney advisors, or both, may be utilized.

**Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information is

estimated to average 0.50 hours per respondent.

**Respondents/Affected Entities:** Participants will be randomly drawn from multiple agencies that conducted a large number of removal actions in the years preceding the sample being drawn. Both removal actions and suspensions of 14 days or less will be the subject of the surveys. For each personnel action, there will be two respondents (the proposing official and the deciding official).

**Estimated Number of Respondents:** 5400.

**Frequency of Response:** Once for most respondents. (If a party was involved in implementing multiple disciplinary or adverse actions, there is a potential to receive more than one survey.)

**Estimated Total Annual Hour Burden:** 2,700.
