6. How should a registry for breast cancer treatments using thermal ablation devices be developed? What data analysis methods need to be considered when developing the registry data set?

7. Have you implemented some form of a registry for breast cancer thermal ablation treatments already? Please describe the extent of implementation, and type of data being collected.

Criteria for Data Inclusion from Breast Cancer Treatments Using Thermal Ablation Devices

10. What is the minimum data set that should be associated with a device use session? Would this minimum data set differ for different devices? If so, how?

11. How would the data in the minimum data set be used to improve patient safety? What other data would improve patient safety?

12. How and by whom should the registry and its associated minimum data set be obtained and maintained?

13. What information should be accessible by the public, healthcare providers, professional organizations, FDA, other Federal Agencies, the industry, and individual manufacturers? How would the information be accessible?

14. What type of proprietary information needs to be excluded?

15. Should data from all thermal ablation device investigators be included or should the data be limited to include only investigators that have received a certain level of training for device use?

Registry Benefits and Costs

16. From your perspective, how could a registry be best used among competing manufacturers of similar product lines? What obstacles do you see in using such an approach for justifying marketing claims?

17. From your perspective, should data previously collected or currently being collected be incorporated by investigators studying the effects of thermal ablation treatment for breast cancer be included in the registry? If so, why, and under what circumstances? If not, why not?

18. From your perspective, what specific public health and patient safety benefits could be gained from having a standardized registry for breast cancer treatments using thermal ablation devices? In addition, how would such a system contribute to meeting device recall and adverse event reporting requirements, and to reducing medical error? Please submit detailed data to support benefits you identify.

19. From your perspective, what are the startup costs measured in time and other resources associated with the development, implementation, and use of a registry for breast cancer treatments using thermal ablation devices? Please submit detailed data to support these cost estimates.

20. If you have already implemented a form of a registry for breast or other cancer treatments using thermal ablation devices, what investments in equipment, training, and other human and physical resources were necessary to implement the use of such a database? What factors influenced your decision to implement such a system?

21. From your perspective, what are the obstacles to implementing or using a registry for breast cancer treatments using thermal ablation devices?
