

A. Export or reexport to or on behalf of the Denied Person any item subject to the Regulations;

B. Take any action that facilitates the acquisition or attempted acquisition by the Denied Person of the ownership, possession, or control of any item subject to the Regulations that has been or will be exported from the United States, including financing or other support activities related to a transaction whereby the Denied Person acquires or attempts to acquire such ownership, possession or control;

C. Take any action to acquire from or to facilitate the acquisition or attempted acquisition from the Denied Person of any item subject to the Regulations that has been exported from the United States;

D. Obtain from the Denied Person in the United States any item subject to the Regulations with knowledge or reason to know that the item will be, or is intended to be, exported from the United States; or

E. Engage in any transaction to service any item subject to the Regulations that has been or will be exported from the United States and which is owned, possessed or controlled by the Denied Person, or service any item, of whatever origin, that is owned, possessed or controlled by the Denied Person if such service involves the use of any item subject to the Regulations that has been or will be exported from the United States. For purposes of this paragraph, servicing means installation, maintenance, repair, modification or testing.

Third, that in accordance with the provisions of section 766.23(c) of the Regulations, the Related Person may, at any time, make an appeal related to this Order by filing a full written statement in support of the appeal with the Office of the Administrative Law Judge, U.S. Coast Guard ALJ Docketing Center, 40 South Gay Street, Baltimore, Maryland 21202-4022.

Fourth, that this Order does not prohibit any export, reexport, or other transaction subject to the Regulations where the only items involved that are subject to the Regulations are the foreign-produced direct product of U.S.-origin technology.

Fifth, that this Order shall be published in the **Federal Register** and a copy provided to the Related Person.

This Order is effective upon publication in the **Federal Register**.

Entered this 19th day of May, 2008.

Darryl W. Jackson,

Assistant Secretary of Commerce for Export Enforcement.

National Institute of Standards and Technology

Announcement of Meeting to Explore Feasibility of Establishing a NIST/ Industry Consortium on Characterization and Modeling of the Surface/Interface of Polymeric Materials and Systems

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: Notice of Public Meeting.

SUMMARY: The National Institute of Standards and Technology (NIST) invites interested parties to attend a pre-consortium meeting on June 13, 2008 to be held on the NIST campus. The goal of the one-day meeting is to evaluate industry interest in creating a NIST/ industry consortium focused on the characterization and modeling of the surface and interface of polymeric materials and composites.

DATES: The meeting will take place on Friday, June 13, 2008 from 9 a.m. to 12 p.m.

ADDRESSES: The meeting will be held in Building 226 room A368 on the NIST Gaithersburg campus, 100 Bureau Drive, Gaithersburg, MD 20899. Please note admittance instructions under the **SUPPLEMENTARY INFORMATION** section of this notice.

FOR FURTHER INFORMATION CONTACT: Aaron M. Forster, Chris A. Michaels, or Lipiin Sung; National Institute of Standards and Technology, 100 Bureau Drive, Stop 8615, Gaithersburg, MD 20899-8615, USA; Telephone: (301) 975-8701; Fax (301) 990-6891; E-mail: aaron.forster@nist.gov, chris.michaels@nist.gov, lipiin.sung@nist.gov.

SUPPLEMENTARY INFORMATION: The National Institute of Standards and Technology (NIST) invites interested parties to attend a pre-consortium meeting on June 13, 2008 to be held on the NIST campus. The goal of the one-day meeting is to evaluate industry interest in creating a NIST/industry consortium focused on the characterization and modeling of the surface and interface of polymeric materials and composites. The goals of such a consortium would include the development of measurement science to

evaluate performance and optical properties of polymeric materials utilizing techniques to measure surface mechanical properties, scratch and mar resistance, and fracture at interfaces. The consortium would be administered by NIST. Consortium research and development would be conducted by NIST staff members along with at least one technical representative from each participating member company. Membership fees for participation in the consortium will be Twenty-five Thousand (\$25,000) per year. The initial term of the consortium is intended to be three years.

All visitors to the NIST site are required to pre-register to be admitted. Anyone wishing to attend this meeting must register by close of business Thursday, June 12, 2008, in order to attend. Please submit your name, time of arrival, e-mail address and phone number to Aaron Forster and he will provide you with instructions for admittance. Non-U.S. citizens must also submit their country of citizenship, title, employer/sponsor, and address. Aaron Forster's e-mail address is aaron.forster@nist.gov and his phone number is (301) 975-8701.

Dated: May 23, 2008.

Richard F. Kayser,

Chief Scientist.

National Institute of Standards and Technology

Notice of Prospective Grant of Exclusive Patent License

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: Notice of Prospective Grant of Exclusive Patent License.

SUMMARY: This is a notice in accordance with 35 U.S.C. 209(c)(1) and 37 CFR 404.7(a)(1)(i) that the National Institute of Standards and Technology ("NIST"), U.S. Department of Commerce, is contemplating the grant of an exclusive license in the United States of America, its territories, possessions and commonwealths, to NIST's interest in the invention embodied in U.S. Patent No. 6,168,755 (Application No. 09/321/113), titled "High Nitrogen Stainless Steel," NIST Docket No. 98-025 to Carpenter Technology Corporation Inc., having a place of business at 101 West Bern Street, Reading, PA 19601. The grant of the license would be for the field of use: Biomedical Applications.

FOR FURTHER INFORMATION CONTACT:

J. Terry Lynch, National Institute of Standards and Technology, Office of Technology Partnerships, 100 Bureau Drive, Stop 2200, Gaithersburg, MD 20899, Phone 301-975-2691.

SUPPLEMENTARY INFORMATION: The prospective exclusive license will be royalty bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective exclusive license may be granted unless, within thirty days from the date of this published Notice, NIST receives written evidence and argument which establish that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7. The availability of the invention for licensing was published in the **Federal Register** on February 16, 2000.

U.S. Patent No. 6,168,755 is owned by the U.S. government, as represented by the Secretary of Commerce. The patent involves a high nitrogen stainless steel alloy and alloy powder comprising chromium (Cr), molybdenum (Mo), manganese (Mn), nickel (Ni), nitrogen (N) and iron (Fe). The composition of the stainless steel alloy and powder comprises between about 27 and about 30% by weight Cr, between about 1.5 and about 4.0% by weight Mo, Mn present and is present in an amount up to 15% by weight, at least about 8% by weight Ni, and about 0.8 to about 0.97% by weight N with the balance being iron. It has been discovered that forming an alloy of this chemistry using nitrogen gas atomization process, followed by a consolidation process, the alloy is less likely to form detrimental ferrite, stable nitride and sigma (.sigma.) phases, without the need for further processing, such as solution treating and quenching. This allows for the formation of stainless steel articles having a thicker cross-section with reduced processing cost.

Dated: May 28, 2008.

Richard F. Kayser,
Chief Scientist.

BILLING CODE 3510-13-P

DEPARTMENT OF COMMERCE**National Oceanic and Atmospheric Administration****Notice of Indirect Cost Rates for the Damage Assessment, Remediation, and Restoration Program for Fiscal Year 2006**

SUMMARY: The National Oceanic and Atmospheric Administration's (NOAA's) Damage Assessment,

Remediation, and Restoration Program (DARRP) is announcing new indirect cost rates on the recovery of indirect costs for its component organizations involved in natural resource damage assessment and restoration activities for fiscal year (FY) 2006. The indirect cost rates for this fiscal year and dates of implementation are provided in this notice. More information on these rates and the DARRP policy can be found at the DARRP Web site at <http://www.darrp.noaa.gov>.

FOR FURTHER INFORMATION CONTACT: For further information, contact LaTonya Burgess at 301-713-4248, ext. 211, by fax at 301-713-4389, or e-mail at LaTonya.Burgess@noaa.gov.

SUPPLEMENTARY INFORMATION: The mission of the DARRP is to restore natural resource injuries caused by releases of hazardous substances or oil under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C. 9601 *et seq.*), the Oil Pollution Act of 1990 (OPA) (33 U.S.C. 2701 *et seq.*), and support restoration of physical injuries to National Marine Sanctuary resources under the National Marine Sanctuaries Act (NMSA) (16 U.S.C. 1431 *et seq.*). The DARRP consists of three component organizations: the Office of Response and Restoration (ORR) within the National Ocean Service; the Restoration Center within the National Marine Fisheries Service; and the Office of the General Counsel for Natural Resources (GCNR). The DARRP conducts Natural Resource Damage Assessments (NRDAs) as a basis for recovering damages from responsible parties, and uses the funds recovered to restore injured natural resources.

Consistent with Federal accounting requirements, the DARRP is required to account for and report the full costs of its programs and activities. Further, the DARRP is authorized by law to recover reasonable costs of damage assessment and restoration activities under CERCLA, OPA, and the NMSA. Within the constraints of these legal provisions and their regulatory applications, the DARRP has the discretion to develop indirect cost rates for its component organizations and formulate policies on the recovery of indirect cost rates subject to its requirements.

The DARRP's Indirect Cost Effort

In December 1998, the DARRP hired the public accounting firm Rubino & McGeekin, Chartered (R&M) to: Evaluate cost accounting system and allocation practices; recommend the appropriate indirect cost allocation methodology;

and determine the indirect cost rates for the three organizations that comprise the DARRP. A **Federal Register** notice on R&M's effort, their assessment of the DARRP's cost accounting system and practice, and their determination regarding the most appropriate indirect cost methodology and rates for FYs 1993 through 1999 was published on December 7, 2000 (65 FR 76611). The notice and report by R&M can also be found on the DARRP Web site at <http://www.darrp.noaa.gov>.

R&M continued its assessment of DARRP's indirect cost rate system and structure for FYs 2000 and 2001. A second federal notice specifying the DARRP indirect rates for FYs 2000 and 2001 was published on December 2, 2002 (67 FR 71537).

In October 2002, DARRP hired the accounting firm of Cotton and Company LLP (Cotton) to review and certify DARRP costs incurred on cases for purposes of cost recovery and to develop indirect rates for FY 2002 and subsequent years. As in the prior years, Cotton concluded that the cost accounting system and allocation practices of the DARRP component organizations are consistent with Federal accounting requirements. Consistent with R&M's previous analyses, Cotton also determined that the most appropriate indirect allocation method continues to be the Direct Labor Cost Base for all three DARRP component organizations. The Direct Labor Cost Base is computed by allocating total indirect cost over the sum of direct labor dollars plus the application of NOAA's leave surcharge and benefits rates to direct labor. Direct labor costs for contractors from I.M. Systems Group (IMSG) were included in the direct labor base because Cotton determined that these costs have the same relationship to the indirect cost pool as NOAA direct labor costs. IMSG provided on-site support to the DARRP in the areas of injury assessment, natural resource economics, restoration planning and implementation, and policy analysis. IMSG continues to provide on-site support to the DARRP. A third federal notice specifying the DARRP indirect rates for FY 2002 was published on October 6, 2003 (68 FR 57672), a fourth notice for the FY 2003 indirect cost rates appeared on May 20, 2005 (70 FR 29280), and a fifth notice for the FY 2004 indirect cost rates was published on March 16, 2006 (71 FR 13356). The last notice for the FY 2005 indirect cost rates was published on February 9, 2007 (72 FR 6221). Cotton's reports on these indirect rates can also be found on the DARRP Web site at <http://www.darrp.noaa.gov>.
