

that SOI's proposed drilling and geotechnical activity would result in the harassment of small numbers of marine mammals; would have no more than a negligible impact on the affected marine mammal stocks; and, subject to development of mitigation measures during discussions with interested parties, would not have an unmitigable adverse impact on the availability of species or stocks for subsistence uses. In addition, implementation of these effective mitigation measures ensures that the taking, by Level B harassment of marine mammals by SOI's offshore drilling activity will have the least practicable effect on marine mammal individuals and populations.

As a result, NMFS proposes to issue an IHA to SOI for conducting an offshore drilling program in the U.S. Beaufort Sea in 2008, provided the previously mentioned monitoring and reporting requirements are incorporated.
