DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA-2006-25756]

Commercial Driver's License (CDL) Standards; Volvo Trucks North America, Inc.'s Exemption Application

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of final disposition; granting of application for exemption.

SUMMARY: FMCSA announces its decision to grant Volvo Trucks North America, Inc.'s (Volvo) application for an exemption for three of its drivers to enable them to test-drive commercial motor vehicles (CMVs) in the United States without a commercial driver's license (CDL) issued by one of the States. Volvo had requested that the exemption cover three Swedish engineers and technicians who will test drive CMVs for Volvo within the U.S. They stated the exemption is needed to support a Volvo field test to meet future air quality standards and to test-drive Volvo prototype vehicles to verify results in "real world" environments. Each of these drivers holds a valid CDL issued in Sweden but lacks the U.S.

residency necessary to obtain a CDL issued by one of the States in the U.S. FMCSA believes the knowledge and skills testing and training program that drivers must undergo to obtain a Swedish CDL ensures that these drivers will achieve a level of safety that is equivalent to, or greater than, the level of safety achieved without the exemption.

DATES: This decision is effective June 18, 2008. The exemption expires on June 18, 2010.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Clemente, Driver and Carrier Operations Division, Office of Bus and Truck Standards and Operations, MC-PSD, Federal Motor Carrier Safety Administration, 1200 New Jersey Avenue, SE., Washington, DC 20590. Telephone: 202-366-4325. E-mail: MCPSD@dot.gov.

SUPPLEMENTARY INFORMATION:

Background

Under 49 U.S.C. 31315 and 31136(e), FMCSA may grant an exemption from the CDL requirements in 49 CFR 383.23 for a 2-year period if it finds "such exemption would likely achieve a level of safety that is equivalent to, or greater than, the level that would be achieved absent such exemption" (49 CFR 381.305(a)). FMCSA has evaluated Volvo's application on its merits and decided to grant the exemption for three of Volvo's engineers and technicians for a 2-year period.

Volvo Application for an Exemption

Volvo applied for an exemption from the 49 CFR 383.23 requirement that the operator of a CMV obtain a CDL. This section of the Federal Motor Carrier Safety Regulations (FMCSRs) sets forth the standards that States must employ in issuing CDLs to drivers operating in commerce. In the U.S., an individual must be a resident of a State in order to qualify for a CDL¹. The Volvo drivers-employees for whom this exemption is sought are all citizens and residents of Sweden; therefore, they cannot apply for a CDL in any State of the United States. A copy of the request for exemption from section 383.23 is in the docket identified at the beginning of this notice.

Swedish Drivers

This exemption enables the following drivers to test-drive in the U.S. Volvo CMVs that are assembled, sold or primarily used in the U.S.: Andreas Hamsten, Carl-Gustaf Theen and Therese Johansson.

Collectively, these drivers form a team of engineers and technicians. Volvo currently employs these drivers in Sweden, and wants them to be able to test-drive Volvo prototype vehicles at its test site and in the vicinity of Phoenix, Arizona, to verify vehicle results in "real world" environments. These drivers would test-drive Volvo CMVs that are assembled, sold or primarily used in the U.S. They are highly trained,

¹ Although 49 CFR 383.23 indicates that these drivers could obtain a Nonresident CDL, few States are currently issuing Nonresident CDLs.
