Proposed Information Collection Activity; Comment Request

Proposed Project

Title: Early Head Start Family and Child Experiences Survey (Baby FACES).

OMB No. New Collection

Description: The Administration for Children and Families (ACF), U.S. Department of Health and Human Services, is conducting a descriptive study of Early Head Start Programs (Early Head Start Family and Child Experiences Survey, or Baby FACES). Baby FACES is a longitudinal study of a nationally representative sample of programs and children in two cohorts (perinatal and age 1) that will collect information about programs, services, families, and children. Data for Baby FACES will be annually collected through interviews with parents, teachers, home visitors, and program directors/managers, as well as direct child assessments, videotaped parent child interactions, and observations of the home environment when children

are two and three years old. Data collection will also include quality observations of child care center classrooms and home visits conducted by program staff.

Data will be collected on a sample of approximately 2,000 children and families selected at random from 90 Early Head Start programs. Over the life of the project, Baby FACES will involve four waves of data collection, ending when the second cohort of children (perinatal cohort) reaches 36 months of age. This information collection request covers the first three years of data collection. All waves of data collection will acquire program level information through an hour-long program director interview. Additionally, staff from all programs will complete a simple service tracking form every week for each child in the sample for all years to determine what services are being delivered to families.

Respondents: Parents of EHS Children, EHS Children, EHS Teachers, Home Visitors, and Program Directors/Managers.
