These proposed revisions would update the guidelines to include guidance on how to comply with new annual catch limit (ACL) and accountability measure requirements for ending overfishing of fisheries managed by federal fishery management plans (FMPs). It also clarifies the relationship between ACLs, maximum sustainable yield, optimum yield (OY), and other applicable reference points. The intent of this action is to facilitate compliance with requirements of the Magnuson-Stevens Act to end and prevent overfishing, rebuild overfished stocks, and achieve OY. NMFS is holding these public meeting to solicit public comments on the proposed guidelines.
