

Section 95.861(c) requires that a 218–219 MHz Service licensee must provide a copy of the plan required by Section 95.815(a) to every TV Channel 13 station whose Grade B predicted contour overlaps the licensed service area for the 218–219 MHz Service system. The 218–219 MHz Service licensee must send the plan to the TV Channel 13 licensee(s) within 10 days from the date the 218–219 MHz Service submits the plan to the Commission, and the 218–219 MHz Service licensee must send updates to this plan to the TV Channel 13 licensee(s) within 10 days from the date that such updates are filed with the Commission pursuant to Section 95.815.

Additionally, each 218–219 MHz Service system licensee must investigate and eliminate harmful interference to television broadcasting and reception, from its component CTSs and RTUs, within 30 days of the time it is notified in writing, by either an affected television station, an affected viewer, or the Commission, of an interference complaint. Should the licensee fail to eliminate the interference within the 30-day period, the CTSs or RTUs causing the problem(s) must discontinue operation.

This information will be used to monitor the co- and adjacent channel interference potential of proposed systems in the 218–219 MHz service, to identify methods being used to minimize interference and show how the proposed systems will meet the service requirements set forth in Section 95.831 of the Commission's rules.
