

Aquaculture Amendment. Reef Fish Amendment 29 proposes to rationalize effort and reduce overcapacity in the commercial grouper and tilefish fisheries in order to achieve and maintain optimum yield (OY). Effort management approaches considered in this amendment include permit endorsements and the implementation of an Individual Fishing Quota (IFQ) program. Spiny Lobster Amendment 8 examines various alternatives to restrict imports of spiny lobster into the United States to minimum conservation standards to achieve an increase in the spawning biomass of the spiny lobster stock and increase long-term yields from the fishery. The Aquaculture amendment will require persons to obtain a permit from NMFS to participate in aquaculture by constructing an aquaculture facility in the EEZ of the Gulf of Mexico. Each application for a permit must comply with many permit conditions related to record keeping and operation of the facility. These permit conditions will assure the facility has a minimal affect on the environment and on other fishery resources. Compliance with the conditions will be evaluated annually for the duration of the permit as the basis for renewal of the permit for the next year.

An informal open question and answers session on IFQ's will begin at 5:30 p.m. At 6 p.m. the public hearings will begin and conclude at the end of public testimony or no later than 9 p.m. at each of the following locations:
