

U.S.C. 225(a)). Individual respondent data are confidential under section (b)(4) of the Freedom of Information Act (5 U.S.C. 552).

Abstract: The monthly FR 2248 report collects balance sheet data on major categories of consumer and business credit receivables, major short-term liabilities, and securitized assets. For quarter-end months (March, June, September, and December), additional asset and liability items are collected to provide a full balance sheet. If the need arises, a special addendum may be used, no more than semi-annually, for timely information on questions of immediate concern to the Federal Reserve.

Current actions: The Federal Reserve proposes to split current data item 6, All other assets and accounts and notes receivable, into three separate data items: Cash and cash equivalents (proposed data item 6.A), Securities held (proposed data item 6.B), and All other assets (proposed data item 6.C). These three new data items would result in improved cash and cash equivalents data. In addition, the Federal Reserve proposes to reduce the current authorized panel size from 80 finance companies to 70. These changes would be effective October 31, 2008.

Board of Governors of the Federal Reserve System, June 26, 2008.

Jennifer J. Johnson,
Secretary of the Board.

1. Description of the collection of information and proposed use

The Fair Credit Reporting Act ("FCRA") provides identity theft victims with certain rights, such as the ability to place fraud alerts on their credit files, designed to assist them in avoiding or mitigating the harms they suffer as a result of the crime.

The Commission intends to use consumer survey research to advance its understanding of the experiences of identity theft victims who interact with consumer reporting agencies (CRAs) and who seek to avail themselves of their FCRA remedies. The consumer research will include focus group interviews of 30 consumers, to be followed by a pretesting phase consisting of phone interviews of another 30 consumers, and then mail surveys sent to individual consumers. The Commission seeks information from consumers who have been victims of identity theft and who have contacted one or more of the three nationwide CRAs for assistance. The information from consumers will be collected on a voluntary basis and will be maintained anonymously. The FTC staff will identify consumers to be contacted for each phase of the research from a random selection of consumers who have communicated with the FTC's Identity Theft Data Clearinghouse database between January 1, 2008 and May 30, 2008. Staff is seeking approximately 1,000 returned surveys because that input would enable it to project the results from the sample to the population from which the sample was drawn with a maximum error rate of 3%. Assuming a response rate of

about 25% - 30%, this would require staff to mail the survey to approximately 3,000 - 4,000 individuals.

Questions to identify theft victims in the research will address several topics, including but not limited to: victim experiences when they contacted one or more CRAs and whether they received the required notice of rights from CRAs; their access to free credit reports; and their ability to place fraud alerts on their files, dispute inaccurate information, and block information due to identity theft. The results of the focus groups and mail surveys will assist the FTC in assessing the experiences of identity theft victims when they interact with CRAs. This assessment will help to inform and guide the FTC's future efforts to enforce provisions of the FCRA and to educate consumers and the consumer reporting industry of their rights and obligations under the FCRA.

2. Estimated hours burden

The FTC staff intends to include a total of 30 consumers divided between three separate focus groups, consisting of 10 per group, and estimates that each consumer will take approximately one hour to participate in the focus groups. Thus, the estimated annual burden imposed by the focus groups will be approximately 30 hours. The staff estimates that respondents to the mail survey will require, on average, approximately 8 minutes to answer the survey (based on anticipated variations among consumers when they interacted with CRAs). The staff will pretest the survey through phone interviews of approximately 30 respondents to ensure that all questions are easily understood. The pretest will take approximately 4 hours as a whole (30 respondents x 8 minutes each). For the full survey, the staff intends to mail 3,000-4,000 surveys and anticipates receiving a response rate as high as 30% of the consumer recipients (i.e., 900 - 1,200 responses). Assuming 1,200 consumers respond to the survey, the staff further estimates the final survey will require approximately 160 hours to complete (1,200 respondents x 8 minutes each). Thus, cumulative burden hours for the clearance would total 194 hours.

3. Estimated cost burden

The cost per respondent should be negligible. Participation is voluntary and will not require start-up, capital, or labor expenditures by respondents.
