Synopsis

As required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3507), the FCC is notifying the public that it received OMB approval on June 23, 2008, for the revised information collection requirements resulting in changes to FCC Forms 316 and 318. The OMB Control Numbers assigned to the information collections are 3060–0009 and 3060–0920, respectively. For revisions to Form 316 (3060–0009), the total annual reporting burden for respondents for these collections of information, including the time for gathering and maintaining the collection of information, is estimated to be: 750 respondents, a total annual burden hours of 855 hours, and \$425,150 in total annual costs. For revisions to Form 318 (3060–0920), the total annual reporting burden for respondents for these collections of information, including the time for gathering and maintaining the collection of information, is estimated to be: 16,659 respondents, a total annual burden hours of 34,396 hours, and \$23,850 in total annual costs.

Under 5 CFR part 1320, an agency may not conduct or sponsor a collection of information unless it displays a current, valid OMB Control Number.

No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act that does not display a valid OMB Control Number. The foregoing notice is required by the Paperwork Reduction Act of 1995, Public Law 104–13, October 1, 1995, 44 U.S.C. 3507.

Federal Communications Commission.

Federal Motor Vehicle Safety Standards; Power-Operated Window, Partition, and Roof Panel Systems**AGENCY:** National Highway Traffic Safety Administration (NHTSA), DOT.**ACTION:** Final rule; response to petitions for reconsideration.

SUMMARY: This document responds to two petitions for reconsideration of a final rule amending the Federal motor vehicle safety standard for power-operated window, partition, and roof panel systems. The subject final rule, statutorily mandated and published in April 2006, established a new safety requirement for vehicle power window switches, specifically that such switches have a “pull-to-close” design. That final rule set a compliance date of October 1, 2008, which was the same as the compliance date for a rule published in September 2004 that amended the standard to include a performance test to prevent inadvertent actuation of power window switches, particularly by children. Petitions for reconsideration were submitted by the Alliance of Automobile Manufacturers (Alliance) and DaimlerChrysler Corporation. The petitioners requested an extension of the compliance date by two years, as well as additional amendments to the standard.

This document grants the requests common to both petitions for an additional two years to comply with the pull-to-close operability requirements of the April 2006 rule. It denies petitioners' other requests. Specifically, we are denying the request that power window switches be excluded from the “pull-to-close” design requirement if the power window systems are equipped with an automatic reversal feature. We are also denying a request for exclusion from the pull-to-close requirement for switches mounted in overhead locations and switches that operate vent-type power windows.

DATES: Effective Date: The amendments made in this final rule are effective September 5, 2008.

Compliance Date: The requirements of the April 2006 final rule pertaining to “pull-to-close” operation of power window switches, as amended by today's rule, become mandatory for all
