In addition, AmerenUE and the resource agencies are assessing a new water management plan during the 2-year rebuild period. AmerenUE is not proposing any PM&Es (except for a 1.4-cfs flow in the river downstream from the project and a historic properties management plan, if needed), but will undertake studies and surveys aimed at providing information needed to develop its proposed environmental measures.

July 2, 2008.

This constitutes notice, in accordance with 18 CFR 385.2201(b), of the receipt of prohibited and exempt off-the-record communications.

Order No. 607 (64 FR 51222, September 22, 1999) requires Commission decisional employees, who make or receive a prohibited or exempt off-the-record communication relevant to the merits of a contested proceeding, to deliver to the Secretary of the Commission, a copy of the communication, if written, or a summary of the substance of any oral communication.

Prohibited communications are included in a public, non-decisional file associated with, but not a part of, the

decisional record of the proceeding. Unless the Commission determines that the prohibited communication and any responses thereto should become a part of the decisional record, the prohibited off-the-record communication will not be considered by the Commission in reaching its decision. Parties to a proceeding may seek the opportunity to respond to any facts or contentions made in a prohibited off-the-record communication, and may request that the Commission place the prohibited communication and responses thereto in the decisional record. The Commission will grant such a request only when it determines that fairness so requires. Any person identified below as having made a prohibited off-the-record communication shall serve the document on all parties listed on the official service list for the applicable proceeding in accordance with Rule 2010, 18 CFR 385.2010.

Exempt off-the-record communications are included in the decisional record of the proceeding, unless the communication was with a cooperating agency as described by 40 CFR 1501.6, made under 18 CFR 385.2201(e)(1)(v).

The following is a list of off-the-record communications recently received by the Secretary of the Commission. The communications listed are grouped by docket numbers in ascending order. These filings are available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at <http://www.ferc.gov> using the eLibrary link. #### **SUPPLEMENTARY INFORMATION:**

##### **I. Summary of Information About the Project/Document**

The "2007 Interim Report of the U.S. EPA Global Change Research Program Assessment of the Impacts of Global Change on Regional U.S. Air Quality: A Preliminary Synthesis of Climate Change Impacts on O<sub>3</sub>" is intended to provide air quality managers and scientists a summary and synthesis of the scientific results that have emerged from the EPA ORD Global Change Research Program (ORD GCRP) assessment of the impact of global change on U.S. regional air quality. The report discusses the studies that have focused on the sensitivity of U.S. air quality to meteorological changes associated with a warming climate in large regions within the continental U.S.

The EPA recognizes that climate-air quality interactions occur at multiple scales (both spatial and temporal), and that an understanding of these interactions demands contributions from several scientific disciplines. The EPA ORD GCRP developed a research and assessment program that combines the resources and expertise of the ORD labs and centers toward the goal of developing the necessary scientific underpinnings. The ultimate goal of the Program is to provide air quality managers with the scientific information and tools needed to evaluate the implications of global change and to enhance their ability to consider global change in their decisions. The "2007

Interim Report of the U.S. EPA Global Change Research Program Assessment of the Impacts of Global Change on Regional U.S. Air Quality: A Preliminary Synthesis of Climate Change Impacts on O<sub>3</sub>" is a preliminary step in that direction.

This report provides an update of the progress that has been made in applying climate and atmospheric chemistry models to investigate potential future meteorological effects on air quality. It does not include changes in air pollutant emissions other than those that are explicitly linked to meteorological variables and incorporated within the models (e.g., biogenic VOC emissions). In addition, it provides a preliminary interpretation of what this improved scientific understanding means for air quality management. Future assessment reports will cover the combined impacts of changing climate and air pollutant emissions on air quality. The program also plans to develop additional reports that focus on additional pollutants, including PM and mercury.

NCEA worked collaboratively with the EPA Office of Air and Radiation (OAR), and ORD's National Risk Management Research Laboratory (NRMRL), National Exposure Research Laboratory (NERL) and National Center for Environmental Research (NCER) on this report.
