SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is issuing a revision to an existing guide in the agency's "Regulatory Guide" series. This series was developed to describe and make available to the public information such as methods that are acceptable to the NRC staff for implementing specific parts of the agency's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the

staff needs in its review of applications for permits and licenses.

Revision 1 of Regulatory Guide 6.5, "General Safety Standards for Installations Using Nonmedical Sealed Gamma-Ray Sources," was issued with a temporary identification as Draft Regulatory Guide DG-6006. This guide directs the reader to the type of information acceptable to the NRC staff to approve the initial transfer of devices containing byproduct material to persons generally licensed under Title 10, Section 31.5, "Certain Detecting, Measuring, Gauging, or Controlling Devices, and Certain Devices for Producing Light or an Ionized Atmosphere," of the *Code of Federal Regulations* (10 CFR 31.5) or equivalent regulations of an Agreement State.

The requirements for transferring gamma-ray sources to general licensees appear in 10 CFR 32.51, "Byproduct Material Contained in Devices for Use Under § 31.5; Requirements for License to Manufacturer, or Initially Transfer". One method of complying with the requirements of 10 CFR 32.51 appears in NUREG-1556, Volume 3, "Consolidated Guidance about Materials Licenses: Applications for Sealed Source and Device Evaluation and Registration."

This regulatory guide endorses the description of the information to be submitted in the application for the initial transfer and installation of sealed gamma-ray sources contained in the current revision of Volume 3 of NUREG-1556 as a method acceptable to the NRC staff.

II. Further Information

Revision 2 of Regulatory Guide 10.5, "Applications for a Type A License of Broad Scope," was issued with a temporary identification as Draft Regulatory Guide DG-0015. This guide directs the reader to the type of information needed by the NRC staff to evaluate an application for a Type A license of broad scope for byproduct material. Title 10, Part 33, "Specific Domestic Licenses of Broad Scope for Byproduct Material," of the Code of Federal Regulations (10 CFR Part 33) regulates this type of license.

This regulatory guide endorses the methods and procedures contained in the current revision of NUREG-1556, Volume 11, "Consolidated Guidance about Materials Licenses: Program-Specific Guidance about Licenses of Broad Scope," as a process that the NRC staff finds acceptable for meeting the
