What Information Is EPA Particularly Interested in?

Pursuant to section 3506(c)(2)(A) of the PRA, EPA specifically solicits comments and information to enable it to:

- (i) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- (ii) Enhance the quality, utility, and clarity of the information to be collected; and
- (iii) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

What Should I Consider When I Prepare My Comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible and provide specific examples.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.
4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.
5. Offer alternative ways to improve the collection activity.
6. Make sure to submit your comments by the deadline identified under **DATES**.
7. To ensure proper receipt by EPA, be sure to identify the docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

What Information Collection Activity or ICR Does This Apply to?

Docket ID No. EPA-OECA-2007-0466.

Affected entities: Entities potentially affected by this action are 10 EPA Regional Offices, 50 States, 4 Territories, and 40 Local Agencies.

Title: State Review Framework.

ICR numbers: EPA ICR No. 2185.03, OMB Control No. 2020-0031.

ICR status: This ICR is currently scheduled to expire on November 30, 2008. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The State Review Framework ("Framework") is an oversight tool designed to assess state performance in enforcement and compliance assurance. The Framework's goal is to evaluate state performance by examining existing data to provide a consistent level of oversight and develop a uniform mechanism by which EPA Regions, working collaboratively with their states, can ensure that state environmental agencies are consistently implementing the national compliance and enforcement program in order to meet agreed-upon goals. Furthermore, the Framework is designed to foster dialogue on enforcement and compliance performance between the states that will enhance relationships and increase feedback, which will in turn lead to consistent program management and improved environmental results. The Framework is described in the April 26, 2005 **Federal Register** Notice (79 FR 21408). This amendment will allow OECA to collect information from enforcement and compliance files reviewed during routine on-site visits of state or local agency offices that will assist in the evaluation of the State Review Framework implementation from FY 2005 to the end of FY 2007. This request will allow EPA to make inquiries to assess the State Review Framework process, including the consistency achieved among the EPA Regions and states, the resources required to conduct

the reviews, and the overall effectiveness of the program.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 376.5 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 94.

Frequency of response: Once every four years.

Estimated total average number of responses for each respondent: one.

Estimated total annual burden hours: 20,331 hours.

Estimated total annual costs: \$679,597.02. This includes an estimated burden cost of \$ 0 for capital investment or maintenance and operational costs.

Are There Changes in the Estimates From the Last Approval?

There is an increase of 3,851.8 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This increase reflects EPA's recent experience with administering the SRF program, an estimated increase in the number of respondents during the next SRF cycle, and its work with the states to try to improve the value and utilization of the elements and metrics by which state environmental programs

are measured. Based upon revised estimates, the annual public reporting and recordkeeping burden for the collection of information under the SRF program has decreased from 384 to 376.5 hours. Additional numbers for these estimates are still being collected and confirmed, so these estimates may change in the final ICR.

What Is the Next Step in the Process for This ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

Dated: July 7, 2008.

Final National Pollutant Discharge Elimination System (NPDES) General Permit for Stormwater Discharges From Construction Activities

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of final permit issuance.

SUMMARY: EPA Regions 1, 3, 6, 7, 8, 9, and 10 today are issuing their 2008 National Pollutant Discharge Elimination System general permits for stormwater discharges from new dischargers engaged in large and small construction activities. Hereinafter, these NPDES general permits will be referred to as "permit" or "2008 construction general permit" or "2008 CGP." "New dischargers" are those who did not file a notice of intent ("NOI") to be covered under the 2003 construction general permit ("2003 CGP") before it expired. Existing dischargers who properly filed an NOI to be covered

under the 2003 CGP continue to be authorized to discharge under that permit according to its terms. The 2008 CGP contains the same limits and conditions as the Agency's 2003 CGP with the exception of a few minor modifications which are detailed below. EPA is issuing this CGP for a period not to exceed two (2) years and will make the permit available to new construction activities and unpermitted ongoing activities only.

DATES: This permit shall be effective on June 30, 2008. This effective date is necessary to provide dischargers with the immediate opportunity to comply with Clean Water Act requirements in light of the expiration of the 2003 CGP on July 1, 2008. In accordance with 40 CFR Part 23, this permit shall be considered issued for the purpose of judicial review on July 28, 2008. Under section 509(b) of the Clean Water Act, judicial review of this general permit can be had by filing a petition for review in the United States Court of Appeals within 120 days after the permit is considered issued for purposes of judicial review. Under section 509(b)(2) of the Clean Water Act, the requirements in this permit may not be challenged later in civil or criminal proceedings to enforce these requirements. In addition, this permit may not be challenged in other agency proceedings. Deadlines for submittal of notices of intent are provided in Part 2.3 of the permit. This permit also provides additional dates for compliance with the terms of these permits.
