Description: The Technical Resource for Incident Prevention (TRIPWire) is DHS's online, collaborative, information-sharing network for bomb squad, law enforcement, and other emergency services personnel to learn about current terrorist improvised explosive device (IED) tactics, techniques, and procedures, including design and emplacement considerations. Developed and maintained by the DHS Office for Bombing Prevention (OBP), the system combines expert analyses and reports with relevant documents, images, and videos gathered directly from terrorist sources to assist law enforcement to anticipate, identify, and prevent IED incidents. The TRIPWire portal contains sensitive information related to terrorist use of explosives and therefore user information is needed to verify eligibility and access to the system.
