

health impacts of exposure to contaminated water at Camp Lejeune. The Act requires the survey to be developed within 120 days of enactment and to be conducted within one year of enactment.

Additionally, in 2005, a panel of independent scientists convened by ATSDR to explore opportunities for conducting additional health studies at Camp Lejeune recommended that the agency:

- Identify cohorts of individuals with potential exposure, including adults who lived on base; adults who resided off base, but worked on base; children who lived on base; and those who may have been exposed while in utero; and
- Conduct a feasibility assessment to address the issues involved in planning future studies of mortality, cancer incidence, and other health outcomes of interest at the base.

In response, ATSDR prepared a report on the feasibility of conducting future epidemiological studies at the base. ATSDR determined that available databases could be used to identify adults who lived at the base or civilians who worked at the base during the period when drinking water was contaminated with volatile organic compounds (VOCs).

In addition to questions on cancers, the health survey will include questions

on non-fatal diseases that can be confirmed by medical records and are known or suspected of being associated with solvent exposures.

This project proposes to examine the relationship between medically confirmed cancers and trichloroethylene—(TCE) or perchloroethylene—(PCE) contaminated drinking water by mathematically modeling the exposure to contaminated drinking water while living or working at Camp Lejeune.

The relationship between the following non-fatal diseases that can be confirmed by medical records and TCE- or PCE-contaminated drinking water will also be examined: Parkinson's disease, kidney failure and other severe kidney diseases, severe liver diseases, lupus, aplastic anemia, TCE-related skin disorders, and scleroderma. In addition, the health survey will include questions on miscarriages occurring to women who were pregnant while residing or working on base.

The health survey will request information about the type of cancer or non-fatal, non-cancer disease, date of diagnosis, hospital of diagnosis, and doctor who diagnosed the disease to facilitate the acquisition of medical record confirmation. Because medical records are usually unavailable for

miscarriages, the survey will not request information to facilitate medical record confirmation of this adverse outcome. For cancers, state of diagnosis will also be obtained to facilitate acquisition of cancer registry data. Self-reported cancers and other diseases will be confirmed by medical records or cancer registrations. To facilitate medical record confirmation, the participant will be asked to provide a copy of the medical record to ATSDR or to sign a medical records release form allowing ATSDR to gain access to the medical record. The survey will also collect information on residential history on base, occupational history, and information on several risk factors (e.g., socio-economic status, demographics, smoking, alcohol consumption, etc). A space will also be provided so that the respondent can report other disease conditions. The collected information will be used to assign exposure status and to assess potential confounding.

To improve the credibility of the study, it is necessary to include an external, unexposed comparison group, similar in all respects to the Marines and civilian workers at Camp Lejeune except for exposure to VOC-contaminated drinking water.

There are no costs to the respondents other than their time.

**ESTIMATED ANNUALIZED BURDEN HOURS**

Respondents	No. of respondents	No. of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
Former active duty marines and navy personnel—Camp Lejeune .....	136,500	1	45/60	102,375
Former civilian workers—Camp Lejeune .....	5,200	1	45/60	3,900
Former dependents (now all adults)—Camp Lejeune .....	14,300	1	45/60	10,725
Former active duty marines and navy personnel—Camp Pendleton (comparison group) .....	32,500	1	45/60	24,375
Former civilian workers—Camp Pendleton (comparison group) .....	6,500	1	45/60	4,875
