SUPPLEMENTARY INFORMATION: EPA is submitting the draft reports for independent, external scientific and technical peer review. The draft reports provide the documentation and scientific evaluation of the environmental effectiveness of the draft AACM protocol as a possible alternative technology in controlling multimedia asbestos emissions during demolition of asbestos-containing buildings, as required by the existing Asbestos National Emission Standard for Hazardous Air Pollutants (NESHAP). The draft AACM demolition protocol was used on two separate buildings. One building contained NESHAP-regulated quantities of asbestos-containing transite siding and the second building contained NESHAP-regulated quantities of asbestos-containing popcorn ceiling and wall surfacing material. In addition to assessing the environmental effectiveness of the draft AACM

technology, these two draft reports assess the costs and time requirements of the application of the AACM protocol in these situations, as well as document lessons learned in each instance.

Public comments received in the docket will be shared with the external peer review panel for their consideration. Although EPA is under no obligation to do so, EPA may consider comments received after the close of the comment period. The public release of this draft document is solely for the purpose of seeking public comment and peer review, and does not represent and should not be construed to represent any EPA policy, viewpoint, or determination.
