

injuries associated with the discharge of hazardous substances at various locations at former mining sites within the Cherokee County Superfund Site, Cherokee County, Kansas. The discharge of hazardous substances injured Service trust resources (migratory birds and threatened and endangered species). The natural resource damages settlement funds compensate for injuries at former lead and zinc mines within the Cherokee County Superfund site and must be used to restore, rehabilitate, replace, and/or to acquire equivalent natural resources at various locations within Cherokee County, Kansas, and in certain cases, in surrounding counties (e.g., Crawford, Montgomery, and Labette Counties).

The RP/EA describes several habitat restoration alternatives. The preferred alternatives consist of, but are not limited to, preservation of high quality prairies and riparian areas, stream sediments dredging, and in some cases, restoration of prairies that have been compromised in some fashion, primarily in Cherokee County. These actions will compensate for injuries to natural resources, including migratory birds, and migratory bird habitat and Threatened and Endangered Species, and are outlined and described in full in the EA/RP.
