[Project No. 516-452]

South Carolina Electric and Gas Company; Notice of Availability of Environmental Assessment

July 18, 2008.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's regulations, 18 CFR part 380 (Order No. 486, 52 FR 47879), the Office of Energy Projects has prepared an environmental assessment (EA) for an application filed by South Carolina Electric and Gas Company (SCE&G) (licensee) on January 17, 2008, for a non-project use of project lands and waters at the Saluda Hydroelectric Project (FERC Project No.516). Specifically, the licensee requests authorization to issue a permit to Lighthouse Developments, Inc. (Lighthouse) to install a community dock that would accommodate 84 watercraft, a boat launch ramp, and parking lot. The proposed facilities would provide boating access to the project's reservoir (Lake Murray) for homeowners in a new residential development known as Paradise Cove. The EA evaluates the environmental impacts that would likely result from

Lighthouse's development proposal. The EA finds that approval of SCE&G's application would not constitute a major federal action significantly affecting the quality of the human environment.

A copy of the EA is on file with the Commission and is available for public inspection. The EA may also be viewed on the Commission's Web site at <http://www.ferc.gov> using the "eLibrary" link. Enter the docket number (P-516) excluding the last three digits in the docket number field to access the document. For assistance, contact FERC Online Support at FERCOnlineSupport@ferc.gov, or toll-free at 1-866-208-3676, or for TTY, (202) 502-8659.

Any comments should be filed by July 31, 2008, and should be addressed to the Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Room 1-A, Washington, DC 20426. Please reference the project name and project number (P-2686) on all comments. Comments may be filed electronically via the Internet in lieu of paper. The Commission strongly encourages electronic filings. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the "eFiling" link. For further information, contact Brian Romanek at (202) 502-6175.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP08-418-000]

Southeast Gas Storage, LLC; Notice of Intent To Prepare an Environmental Assessment for the Proposed Black Warrior Storage Project and Request for Comments on Environmental Issues

July 21, 2008.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of the Black Warrior Storage Project involving construction and operation of facilities by Southeast Gas Storage, LLC (Southeast) in Monroe and Lowndes Counties, Mississippi.¹ These facilities

would consist of new natural gas pipeline, abandonment by removal of existing pipeline, new existing injection/withdrawal wells, new gathering pipelines, a new salt water disposal pipeline, conversion of existing gas wells to observation wells, a new salt water disposal well, a new compressor station and a new meter station. This EA will be used by the Commission in its decision-making process to determine whether the project is in the public convenience and necessity.

This notice announces the opening of the scoping process the Commission will use to gather input from the public and interested agencies on the project. Your input will help determine which issues need to be evaluated in the EA. Please note that the scoping period will close on August 20, 2008. Details on how to submit comments are provided in the Public Participation section of this notice.

If you are a landowner receiving this notice, you may be contacted by a pipeline company representative about the acquisition of an easement to construct, operate, and maintain the proposed facilities. The pipeline company would seek to negotiate a mutually acceptable agreement. However, if the project is approved by the Commission, that approval conveys with it the right of eminent domain. Therefore, if easement negotiations fail to produce an agreement, the pipeline company could initiate condemnation proceedings in accordance with state law.

A fact sheet prepared by the FERC entitled "An Interstate Natural Gas Facility On My Land? What Do I Need To Know?" was attached to the project notice Southwest provided to landowners. This fact sheet addresses a number of typically asked questions, including the use of eminent domain and how to participate in the Commission's proceedings. It is available for viewing on the FERC Internet Web site (www.ferc.gov).

Summary of the Proposed Project

Southeast proposes to convert a nearly depleted oil and gas reservoir into a high-deliverability natural gas storage facility approximately 3.5 miles northwest of Caledonia in Monroe and Lowndes Counties, Mississippi. The purpose of this project is to provide 24.7 billion cubic feet of working gas capacity to customers in the region. Southeast would achieve this capacity by drilling new withdrawal/injection wells, converting, reworking or plugging existing wells, constructing lateral and

¹ Southwest's application was filed with the Commission under section 7 of the Natural Gas Act and Part 157 of the Commission's regulations.
