If no claim of confidentiality is asserted when the information is received by EPA, it may be made available to the public without further notice to the respondents (40 CFR 2.203). Individual reporting data may be claimed as sensitive and will be treated as confidential information in accordance with procedures outlined in 40 CFR part 2.

**Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information is estimated to average 2 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

**Respondents/Affected Entities:** Producers, importers, distributors, and custom applicators of methyl bromide, organizations, consortia, and associations of methyl bromide users, as well as individual methyl bromide users.

**Estimated Number of Respondents:** 2179.

**Frequency of Response:** Quarterly for producers and importers, annually for distributors and applicators, periodically (at the time of purchase) for end users.

**Estimated Total Annual Hour Burden:** 4918.

**Estimated Total Annual Cost:** \$993,622, which includes no capital or O&M costs.

**Changes in the Estimates:** There is a decrease of 82 hours in the total estimated respondent burden compared with the burden currently approved by OMB. This estimate for total burden hours includes updated burden estimates from this ICR as well as ICR 2060-0564, which is being transferred into this ICR.

The reason for the decrease in burden hours is that the Agency has six years of experience managing the critical use exemption program, which has led to efficiency and greater accuracy in estimating future burden. Over the last four years, EPA has received on average 65 applications each year, rather than the 100 estimated in the previous ICR. EPA continues to encourage users with similar circumstances to utilize grower and user organizations to aid in completion of the application, thereby reducing both the burden on applicants (particularly small businesses) and the Agency. The registration of additional alternatives since 2002 in the U.S. may also result in fewer applications received. Furthermore, stakeholders are more familiar with the critical use exemption program and have already organized associations to apply on behalf of multiple growers. Other reasons for burden reduction include the encouragement of electronic submission of applications and other data and very frequent EPA communication with methyl bromide stakeholders.
