

conduct the necessary research, perform the appropriate analyses and prepare the permit application with documentation to demonstrate that their project meets all applicable statutory and regulatory NSR requirements. Specific activities and requirements are listed and described in the Supporting Statement for the ICR.

Reviewing authorities review the permit application, provide for public

review of the proposed project, and issue the permit based on its consideration of all technical factors and public input. The EPA, more broadly, reviews a fraction of the total applications and audits the state and local programs for their effectiveness. Consequently, information prepared and submitted by the source is essential for the source to receive a permit, and for

Federal, state and local environmental agencies to adequately review the permit application and thereby properly administer and manage the NSR programs.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to be broken down as follows:

Type of permit action	Major PSD	Major Part D	Minor
Number of sources	282	519	74,591
Burden Hours per Response:			
Industry	866	642	40
Permitting Agencies	301	127	30

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Industrial plants, state and local permitting agencies.

Estimated Number of Respondents: 150,821.

Frequency of Response: 1 per respondent.

Estimated Total Annual Hour Burden: 5,951,068 hours.

Estimated Total Annual Cost: \$486,452,000, which includes \$475,056,000 annual labor costs and \$11,396,000 annual capital/startup and O&M costs.

Changes in the Estimates: There is an increase of 44,960 in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. The number of respondents has increased by 51 due to the decision by the U.S. Court of Appeals for the DC. Circuit to vacate the Clean Units and Pollution Control Project Exclusion provisions of the NSR program. In addition, the burden per permit for Part C major NSR permit applications increased based on active consultation with NACAA, conducted in January 2008.

Dated: July 29, 2008.
Sara Hisel-McCoy,
Director, Collections Strategies Division.

Interim Report of the U.S. EPA Global Change Research Program Assessment of the Impacts of Global Change on Regional U.S. Air Quality: A Preliminary Synthesis of Climate Change Impacts on O₃

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Peer-Review Workshop.

SUMMARY: EPA is announcing that Versar, Inc., an EPA contractor for external scientific peer review, will convene an independent panel of experts and organize and conduct an external peer-review workshop to review the external review draft document titled, "Interim Report of the U.S. EPA Global Change Research Program Assessment of the Impacts of Global Change on Regional U.S. Air Quality: A Preliminary Synthesis of Climate Change Impacts on O₃" (EPA/600/R-07/094). The draft document was prepared by the National Center for Environmental Assessment (NCEA) within EPA's Office of Research and Development.

The public comment period, announced in (73 FR 39695), and the external peer-review workshop are separate processes that provide opportunities for all interested parties to comment on the document. EPA has released this draft document solely for

the purpose of pre-dissemination peer review under applicable information quality guidelines. This document has not been formally disseminated by EPA. It does not represent and should not be construed to represent any Agency policy or determination.

EPA invites the public to register to attend this workshop as observers. In addition, EPA invites the public to give oral and/or provide written comments at the workshop regarding the draft document under review. The draft document and EPA's peer-review charge are available primarily via the Internet on NCEA's home page under the Recent Additions and the Data and Publications menus at www.epa.gov/ncea. In preparing a final report, EPA will consider the Versar, Inc. report of the comments and recommendations from the external peer-review workshop and any public comments that EPA receives in accordance with this notice.

DATES: The peer-review panel workshop will begin on August 26, 2008, at 8:30 a.m. and end at 5 p.m. on the same day.

ADDRESSES: The peer-review workshop will be held at the U.S. EPA, Research Triangle Park Campus, 109 TW Alexander Drive, Durham, NC 27709. The EPA contractor, Versar Inc., is organizing, convening, and conducting the peer-review workshop. To attend the workshop, register by August 19, 2008, preferably via the Internet at <http://epa.versar.com/climatechangeimpactsonozone>, or via the following means: by calling Versar, Inc. at 703-750-3000, extension 737 or 211; sending a facsimile to *Attn:* Malukah Moore at 703-642-6954, or; sending an e-mail to mmoore@versar.com and dsinkowski@versar.com. The draft "Interim Report of the U.S. EPA Global Change Research Program Assessment of the Impacts of Global Change on Regional U.S. Air Quality: A

Preliminary Synthesis of Climate Change Impacts on O₃” is available primarily via the Internet on the National Center for Environmental Assessment’s home page under the Recent Additions and the Data and Publications menus at www.epa.gov/ncea. A limited number of paper copies are available from the Information Management Team, NCEA; *telephone*: 703–347–8561; *facsimile*: 703–347–8691. If you are requesting a paper copy, please provide your name, mailing address, and the document title. Copies are not available from Versar, Inc.

FOR FURTHER INFORMATION CONTACT:

Questions regarding information, registration, access or services for individuals with disabilities, or logistics for the external peer-review workshop should be directed to Versar, Inc., 6850 Versar Center, Springfield, VA 22151; *telephone*: 703–750–3000, extension 737 or 211; *facsimile*: Attn.: Malukah Moore at 703–642–6954; e-mail: mmoore@versar.com and dsinkowski@versar.com. To request accommodation of a disability, please contact Malukah Moore at mmoore@versar.com or 703–750–3000, ext. 211, preferably at least 10 days prior to the meeting, to give as much time as possible to process your request.

If you need technical information about the document, please contact Brooke L. Hemming, Ph.D., National Center for Environmental Assessment (NCEA); *telephone*: 919–541–5668; *facsimile*: 919–541–7885; e-mail: hemming.brooke@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Summary of Information About the Project/Document

The “Interim Report of the U.S. EPA Global Change Research Program Assessment of the Impacts of Global Change on Regional U.S. Air Quality: A Preliminary Synthesis of Climate Change Impacts on O₃” is intended to provide air quality managers and scientists a summary and synthesis of the scientific results that have emerged from the EPA ORD Global Change Research Program (ORD GCRP) assessment of the impact of global change on U.S. regional air quality. The report discusses the studies that have focused on the sensitivity of U.S. air quality to meteorological changes associated with a warming climate in large regions within the continental U.S. The EPA recognizes that climate-air quality interactions occur at multiple scales (both spatial and temporal), and that an understanding of these interactions demands contributions from several scientific disciplines. The

EPA ORD GCRP developed a research and assessment program that combines the resources and expertise of the ORD labs and centers toward the goal of developing the necessary scientific underpinnings. The ultimate goal of the Program is to provide air quality managers with the scientific information and tools needed to evaluate the implications of global change and to enhance their ability to consider global change in their decisions. The “Interim Report of the U.S. EPA Global Change Research Program Assessment of the Impacts of Global Change on Regional U.S. Air Quality: A Preliminary Synthesis of Climate Change Impacts on O₃” is a preliminary step in that direction. This report provides an update of the progress that has been made in applying climate and atmospheric chemistry models to investigate potential future meteorological effects on air quality. It does not include changes in air pollutant emissions other than those that are explicitly linked to meteorological variables and incorporated within the models (e.g., biogenic VOC emissions). In addition, it provides a preliminary interpretation of what this improved scientific understanding means for air quality management. Future assessment reports will cover the combined impacts of changing climate and air pollutant emissions on air quality. The program also plans to develop additional reports that focus on additional pollutants, including PM and mercury. NCEA worked collaboratively with the EPA Office of Air and Radiation (OAR), and ORD’s National Risk Management Research Laboratory (NRMRL), National Exposure Research Laboratory (NERL) and National Center for Environmental Research (NCER) on this report.

II. Workshop Information

Members of the public may attend the workshop as observers, and there will be a limited time for comments from the public in the afternoon. Please let Versar, Inc. know if you wish to make comments during the workshop. Space is limited, and reservations will be accepted on a first-come, first-served basis.

Dated: July 25, 2008.

Rebecca Clark,

Deputy Director, National Center for Environmental Assessment.

Pesticides; Revised Fee Schedule for Registration Applications

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA is publishing a revised list of pesticide registration service fees applicable to specified pesticide applications and tolerance actions. Under the Pesticide Registration Improvement Renewal Act, the registration service fees for covered pesticide registration applications received on or after October 1, 2008, increase by 5% rounding up to the nearest dollar from the fees published for fiscal year 2008, and certain decision review periods have been reduced. The new fees and decision review periods become effective on October 1, 2008.

FOR FURTHER INFORMATION CONTACT: Elizabeth Leovey (7501P), Immediate Office, Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460–0001; *telephone* number: (703) 305–7328; *fax* number: (703) 308–4776; e-mail address: leovey.elizabeth@epa.gov.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

You may be potentially affected by this action if you register pesticide products under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). Potentially affected entities may include, but are not limited to:

- Agricultural pesticide manufacturers (32532).
- Antimicrobial pesticide manufacturers (32561).
- Antifoulant pesticide manufacturers (32551).
- Wood preservative manufacturers (32519).

This listing is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be affected by this action. Other types of entities not listed in this unit could also be affected. The North American Industrial Classification System (NAICS) codes have been provided to assist you and others in determining whether this action might apply to certain entities. To determine whether you or your business may be affected by this action, you should carefully examine the applicability provisions in the notice and in FIFRA section 33. If
