

Manufacturing Division, Dallas, Texas; TA-W-62,197; issued November 8, 2007). Because only one case was found, the Department did not consider the certification to be relevant to the case at hand, much less indicative of likely increased aggregate imports of semiconductor wafers.

After the Department issued the negative determination on remand on June 6, 2008, however, the Department received information during the investigation of another matter remanded to the Department for further investigation, *Former Employees of Fairchild Semiconductor Corporation v. United States Secretary of Labor*, Court No. 06-00215 (*FEO Fairchild*) that caused the Department to reconsider the case at hand.

During the remand investigation of *FEO Fairchild*, the Department received information that Fairchild would begin importing semiconductor wafers in 2008. Upon receiving this information, the Department reviewed previously-submitted information in other cases to determine whether there were any indications that other domestic producers of semiconductor wafers did or would be importing semiconductor wafers in the time period consisting of May 2007 through the present.

The information that was the basis for the certification of Fairchild Semiconductor International, Mountain Top, Pennsylvania (TA-W-58,624; Notice of Revised Determination on Remand issued on July 22, 2008) combined with the information obtained from a careful review of previously-certified cases indicates the likelihood that there would be increased imports of semiconductor wafers in the time period after production shifted from Intel Corporation, Fab 23, Colorado Springs, Colorado to a foreign country.

In accordance with Section 246 the Trade Act of 1974 (26 U.S.C. 2813), as amended, the Department herein presents the results of its investigation regarding certification of eligibility to apply for ATAA. The Department has determined in this case that the group eligibility requirements of Section 246 have been met.

A significant number of workers at the firm are age 50 or over and possess skills that are not easily transferable. Competitive conditions within the industry are adverse.

Conclusion

After careful review of the facts obtained subsequent to the issuance of the negative remand determination, I determine that there was a total separation of a significant number or proportion of workers at the subject

facility, and that there was a shift in production to a foreign country followed by likely increased imports of articles like or directly competitive with semiconductor wafers produced at the subject facility. In accordance with the provisions of the Act, I make the following certification:

"All workers of Intel Corporation, Fab 23, Colorado Springs, Colorado, who became totally or partially separated from employment on or after May 30, 2006, through two years from the issuance of this revised determination, are eligible to apply for Trade Adjustment Assistance under Section 223 of the Trade Act of 1974, and are eligible to apply for alternative trade adjustment assistance under Section 246 of the Trade Act of 1974."

Signed at Washington, DC, this 25th day of July 2008.

Elliott S. Kushner,

Certifying Officer, Division of Trade Adjustment Assistance.

NUCLEAR REGULATORY COMMISSION

Notice; Applications and Amendments to Facility Operating Licenses Involving Proposed No Significant Hazards Considerations and Containing Sensitive Unclassified Non-Safeguards Information or Safeguards Information and Order Imposing Procedures for Access to Sensitive Unclassified Non-Safeguards Information or Safeguards Information

I. Background

Pursuant to section 189a.(2) of the Atomic Energy Act of 1954, as amended (the Act), the U.S. Nuclear Regulatory Commission (the Commission or NRC staff) is publishing this notice. The Act requires the Commission publish notice of any amendments issued, or proposed to be issued and grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This notice includes notices of amendments containing sensitive unclassified non-safeguards information (SUNSI) or safeguards information (SGI).

Notice of Consideration of Issuance of Amendments to Facility Operating Licenses, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination.

Normally, the Commission will not issue the amendment until the
