

update their previous submission earlier to comply with a rule requirement.

Estimated total average number of responses for each respondent: one.

Estimated total annual burden hours: 93,982 hours including burden for implementing agencies.

Estimated total annual costs: \$9,785,371.00. There are no capital or operating and maintenance costs associated with this ICR since all sources are required to submit RMPs on-line using the new electronic reporting system, RMP e*submit.

There is a decrease of 4,617 hours for all sources and states from the previous ICR. There are two primary reasons for this decrease in burden. First, as explained in section 1 of the supporting statement for this ICR renewal (the supporting statement is available at <http://www.regulations.gov>), the burden varies from ICR to ICR due to different compliance deadlines based on the sources' RMP re-submission deadlines and other regulatory deadlines.

Therefore, the burden increases or decreases each year depending on how many sources have to submit their RMP and comply with certain prevention program requirements. Second, the number of sources subject to the regulations is lower than in the previous ICR (16,634 in the previous ICR and 13,718 sources in this ICR period).

What Is the Next Step in the Process for This ICR?

EPA will consider the comments received and amend the ICR as

appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.
