SUPPLEMENTARY INFORMATION: On August 15, 2008, the U.S. Fish and Wildlife Service (Service) issued a permit (PRT-192748) to the Alaska Department of Fish and Game, Fairbanks, AK, to take one captive held male wood bison (*Bison bison athabascaae*) for the purpose of scientific research into animal and human health. This action was authorized under Section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*). The Service determined that an emergency affecting the health and life of the Alaska captive held population existed, and that no reasonable alternative was available to the applicant for the following reasons:

One seven year old adult male wood bison owned by the State of Alaska and held at the Alaska Wildlife Conservation Center, Girdwood, Alaska, became weak and emaciated, and tested positive for Cryptosporidium, threatening the health of other wood bison in the captive herd and presenting a risk to human health.
