Since approval of the current ICR, we have completed promulgation of MACT standards for the source category list, resulting in few major sources that could be constructed or reconstructed over the next 3 years that do not have applicable MACT standards.

Title: Clean Air Interstate Rule to Reduce Interstate Transport of Fine Particle Matter and Ozone (Renewal).

ICR numbers: EPA ICR No. 2152.03, OMB Control No. 2060-0570.

ICR Status: This ICR is currently scheduled to expire on September 30, 2008. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information,

unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The United States (U.S.) Environmental Protection Agency (EPA) promulgated the Clean Air Interstate Rule to Reduce Interstate Transport of Fine Particulate Matter and Ozone, which includes reporting requirements and combines these requirements with existing requirements from the Consolidated Emissions Reporting Rule (CERR), the Emission Reporting Requirements for Ozone State Implementation Plan (SIP) Revisions Relating to Statewide Budgets for NO_x Emissions to Reduce Regional Transport of Ozone (NO_x SIP Call) and the Acid Rain Program under Title IV of the CAA Amendments of 1990. Each of these three existing requirements has an approved ICR in place. This ICR is being submitted to account for the incremental burden associated with CAIR. The ICR details the additions and changes to reporting requirements associated with CAIR. These changes include: (1) Changes to existing requirements for emission reporting under the CERR; and (2) the addition of reporting requirements to support emissions trading in States using the CAIR model cap and trade rules.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 87 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 1,190.

Frequency of response: Quarterly.

Estimated total annual burden hours: 404,705 hours.

Estimated total annual costs:

\$51,472,083, which included \$26,309,080 in capital and O&M costs.

Changes in the Estimates: There is an increase of 22,012 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This ICR incorporates the burden associated with all CAIR-affected sources, including those located in NO_x SIP Call States. The NO_x SIP Call ICR (OMB Control Number 2060-0445) expires at the end of 2008. As such, starting in 2009, the burden associated with the NO_x trading program requirements under the NO_x SIP Call are now covered in this ICR. Without incorporating those burdens and costs, the overall labor burden in this ICR would be less than the estimate in the prior version of this ICR.

Abstract: Section 4010(c) of the Resource Conservation and Recovery Act (RCRA) of 1976 requires that EPA revise the landfill criteria promulgated under paragraph (1) of Section 4004(a) and Section 1008(a)(3). Section 4005(c) of RCRA, as amended by the Hazardous Solid Waste Amendments (HSWA) of 1984, requires states to develop and implement permit programs to ensure that municipal solid waste landfills (MSWLFs) and non-municipal, non-hazardous waste disposal units that receive household hazardous waste or conditionally exempt small quantity generator (CESQG) hazardous waste are in compliance with the revised criteria for the design and operation of non-municipal, non-hazardous waste disposal units under 40 CFR Part 257, Subpart B and MSWLFs under 40 CFR Part 258. (40 CFR Part 257, Subpart B and 40 CFR Part 258 are henceforth referred to as the "revised federal criteria".) Section 4005(c) of RCRA further mandates the EPA Administrator to determine the adequacy of state permit programs to ensure owner and/or operator compliance with the revised federal criteria. A state program that is deemed adequate to ensure compliance
