On June 12, 2008, the Commission released two Orders in WC Docket No. 07–38. They are a Report and Order and Further Notice of Proposed Rulemaking, FCC 08–89 and an Order on Reconsideration, FCC 08–148. With

these two Orders, the Commission revises the FCC Form 477 data collection to improve the Commission's understanding of the extent of broadband deployment, facilitating the development of appropriate broadband policies.

The Report and Order revises FCC Form 477 to require all broadband providers to report the number of broadband connections in service in individual Census Tracts. The Report and Order provides for additional methods to add to the data reported by FCC Form 477 filers, including a voluntary household self-reporting system, and a recommendation to the Census Bureau that the American Community Survey questionnaire be modified to gather information about broadband availability and subscription in households. The Report and Order adopts three additional changes to the FCC Form 477. First, it requires providers to report broadband service speed data in conjunction with subscriber counts according to new categories for download and upload speeds. These new speed tiers will better identify services that support advanced applications. Second, it amends reporting requirements for mobile wireless broadband providers to require them to report the number of subscribers whose data plans allow them to browse the Internet and access the lawful Internet content of their choice. Third, it requires providers of interconnected Voice over Internet Protocol (interconnected VoIP) service to report subscribership information on FCC Form 477. The Order on Reconsideration amends FCC Form 477 to require filers to report the percentage of broadband connections that are residential at the Census Tract level.

The information is necessary to evaluate the status of local telephone competition and the status of broadband services deployment. The information assists the Commission in preparing the report mandated by section 706 of the Telecommunications Act of 1996, and it is used by the Commission to evaluate the efficacy of Commission rules and policies adopted to implement the Telecommunications Act of 1996.

Federal Communications Commission.
