NUCLEAR REGULATORY COMMISSION

[Docket No. 03031655]

Notice of Availability of Environmental Assessment and Finding of No Significant Impact for License Amendment Request to Byproduct Materials License No. 45–03499–08 for the College of William and Mary, Williamsburg, VA

AGENCY: Nuclear Regulatory Commission.

ACTION: Issuance of Environmental Assessment and Finding of No Significant Impact for License Amendment.

FOR FURTHER INFORMATION CONTACT:

Thomas K. Thompson, Senior Health Physicist, Commercial and R&D Branch, Division of Nuclear Materials Safety, Region I, 475 Allendale Road, King of Prussia, Pennsylvania; telephone: (610) 337–5303; fax number: (610) 337–5269; or by e-mail:

Thomas.Thompson@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is considering the issuance of a license renewal to Byproduct Materials License No. 45-03499–08. This license is held by The College of William and Mary (the Licensee) in Williamsburg, Virginia. As part of its license renewal, the Licensee has requested an exemption from the requirement in 10 CFR 30.32(g) to list sealed sources by their manufacturer and model number as registered under the provisions of 10 CFR 32.210. The Licensee requested this exemption in a letter dated October 31, 2005. The NRC has prepared an Environmental Assessment (EA) in support of this proposed action in accordance with the requirements of Title 10, Code of Federal Regulations (CFR), Part 51 (10 CFR Part 51). Based on the EA, the NRC has concluded that a Finding of No Significant Impact (FONSI) is appropriate with respect to the proposed action. The license renewal, including the approval of the exemption request, will be issued to the Licensee

following the publication of this FONSI and EA in the **Federal Register**.

II. Environmental Assessment

Identification of Proposed Action

The proposed action would renew License No. 45–03499–08, including approval of the Licensee's request for exemption submitted on October 31, 2005. License No. 45–03499–08 was issued on September 14, 1990, pursuant to 10 CFR Parts 30 and 70, and has been amended periodically since that time. This license authorized the Licensee for laboratory research, calibration, and teaching and training of students. It also authorized the possession of neutron sources containing plutonium for storage incident to disposal.

On June 29, 2005, the Licensee submitted its renewal application for License No. 45–03499–08. In a letter dated October 31, 2005, submitted in response to an inquiry from the NRC, the Licensee requested an exemption from the requirement in 10 CFR 30.32(g) to list sealed sources by manufacturer and model number as registered under the provisions of 10 CFR 32.210. In requesting this exemption, the Licensee states that most of its source inventory consists of sealed sources which have long been in their possession and that most do not bear a manufacturer's name or model number, and that it therefore would be unable to provide that information.

Need for the Proposed Action

The Licensee possesses neutron sources containing plutonium being held for disposal, and other sources of low activity, less than a millicurie each, and has possessed and used these sources for many years without incident. This exemption is needed to authorize the Licensee to continue to possess these sources.

Technical Analysis of the Proposed Action

10 CFR 30.11(a) states that the Commission may grant such exemptions from the requirements of the regulations as it determines are authorized by law and will not endanger life or property or the common defense and security and are otherwise in the public interest. The NRC staff has analyzed the Licensee's request to be authorized to receive and take possession of sealed sources and devices which have not been registered with the NRC under 10 CFR 32.210 or with an Agreement State. The NRC staff considered that the Licensee is qualified by sufficient training and experience and has sufficient facilities and equipment to handle these sources and
