Proposed Information Collection Activity; Comment Request; Proposed Projects

Title: Supporting Healthy Marriage Project Baseline Data Collection Extension.

OMB No.: 0970-0299.

Description: The Administration for Children and Families (ACF) is conducting an evaluation study titled Supporting Healthy Marriage (SHM). This is a large-scale, multi-site, rigorous test of marriage and relationship skills education programs for low-income

married couples. The baseline information collection for the study was previously approved by the Office of Management and Budget (OMB Number 0970-0299) and expires on May 31, 2009. The purpose of this notice is to inform the public of ACF's intent to request an extension of this clearance prior to its expiration.

The SHM project is founded on research that indicates that both adults in healthy marriages and their children do better on a host of outcomes. The evaluation study will determine the interim and long-term effectiveness of eight local programs by comparing outcomes on a range of measures for couples and children in the program group to a comparable group of couples randomly assigned to a control group.

Baseline information is collected from couples at the time they volunteer to participate in a SHM program. The baseline data collection provides information about the characteristics of the husband and wife and information about their attitudes and beliefs about their relationship at study entry. This information will be used to inform the public, program operators and policymakers about the characteristics of married couples who volunteer for marriage education programs, and, among other uses, it will be used to define and conduct analyses of key sub groups, addressing a key study question of who benefits most from this type of marriage education service.

Respondents: Low-income married couples.
