

Alternative E: Rangeland Health Standards would be achieved over the life of the MMP by making modifications to grazing management including temporary grazing suspensions on allotments which fail Utah BLM's Rangeland Health Standards for upland soils, desired species, and riparian/wetland functionality. This alternative proposes an emphasis on vegetation restoration activity without structural range improvements. Grazing permits would be renewed with modified Terms and Conditions consistent with the actions proposed in this alternative.

Potentially impacted resources and conditions include: Livestock management, compliance with Standards and Guidelines for Rangeland Health, socio-economics, cultural resources, and recreation.

Jeff Rawson,

Associate Utah State Director.
