Title: Pilot Study for the National Survey of Veterans (NSV), Active Duty Service Members, Activated National Guard and Reserve Members, Family Members and Survivors.

OMB Control Number: 2900-NEW (NSV).

Type of Review: New collection.

Abstract: The pilot will collect information on awareness, demographics and provide information needed to determine the best sampling scheme and data collection methodology for the NSV data collection effort. The pilot will also assess the response rates and coverage

of the populations of interests for the sampling approach for the NSV. One of the VA's many goals is to monitor and improve veteran health and well-being. The scope of the NSV is being expanded to address the requirements of Public Law 108-454, section 805, to assess awareness of VA benefits and services among four populations: Veterans, active duty service members, National Guard and Reserve members activated under Title 10, and spouses and survivors of veterans. Because the NSV collects needed information that is not available in VA administrative files and because the infrequent administration of the NSV, it is important that we minimize the total survey error associated with the study design. It is for these reasons that the VA has planned to conduct a pilot study to inform the design of the next NSV.
