

plan will be developed and implemented in accordance with requirements of the Environmental Protection Agency (40 CFR 230.91 through 230.97), and in coordination with the Army Corps of Engineers and the Bureau of Land Management.

The Department will implement the conservation and minimization measures listed in the biological opinion to protect Ute ladies'-tresses, and the reasonable and prudent measures identified by the Fish and Wildlife Service to protect the Mojave population of the desert tortoise. Implementation of these measures will be coordinated with the Bureau of Land Management and Surface Transportation Board, as appropriate.

Based on all of the above, DOE will prepare a Mitigation Action Plan in accordance with its NEPA regulations (10 CFR 1021.331). The Mitigation Action Plan will include an introduction describing the basis, function, and organization of the plan; a summary of the potential impacts to be mitigated; a description of preliminary best management practices and specific mitigation measures from Chapter 7 of the final Rail Alignment EIS; a description of all mitigation commitments in this Record of Decision, including wetlands compensatory measures and measures to protect the Mojave desert tortoise and Ute ladies'-tresses; a description of the Mitigation Action Plan monitoring and reporting system that DOE will implement to ensure that elements of the plan are met and are effective; and a schedule for actions and identification of the responsible parties. DOE will develop the Mitigation Action Plan in consultation with the proposed Mitigation Advisory Board(s) and directly affected parties.

The Mitigation Action Plan will be completed and made publicly available before DOE takes any action under this decision that is the subject of a mitigation commitment. DOE may revise the Plan as more specific and detailed information becomes available, or in consultation with the proposed Mitigation Advisory Board(s) and directly affected parties. At this stage in the process, the Department has adopted all practicable means to avoid or minimize environmental harm.
