The estimated total cost to respondents is \$607.62. [10 hours divided by 2080 hours¹ per year, times \$126,384² equals \$607.62]. The average cost per respondent is \$60.76.

The reporting burden includes the total time, effort, or financial resources expended to generate, maintain, retain, disclose, or provide the information including: (1) Reviewing instructions; (2) developing, acquiring, installing, using technology and systems for the purposes of collecting, validating, verifying, processing, maintaining, disclosing and providing information; (3) adjusting the existing ways to comply with any previously applicable filing instructions and requirements; (4) training personnel to respond to a collection of information; (5) searching data sources; (6) completing and reviewing the collection of information; and (7) transmitting, or otherwise disclosing the information.

The cost estimate for respondents is based upon salaries for professional and clerical support, as well as direct and indirect overhead costs. Direct costs include all costs directly attributable to providing this information, such as administrative costs and the cost for information technology. Indirect or overhead costs are costs incurred by an organization in support of its mission. These costs apply to activities which benefit the whole organization rather than any one particular function or activity.

Comments are invited on: (1) The accuracy of the agency's burden estimate of the proposed information collection, including the validity of the methodology and assumptions used to calculate the reporting burden; (2) ways to enhance the quality, utility and clarity of the information to be collected.

This assistance agreement program strengthens EPA's partnership with the States by supporting state innovation compatible with EPA's *Innovation Strategy*. EPA wants to encourage states to build on previous experience (theirs and others) to undertake strategic innovation projects that promote larger-scale models for “next generation” environmental protection and promise better environmental outcomes and other beneficial results. EPA is interested in funding projects that: (i) Go beyond a single facility experiment
