

fee for all prescriptions. While the State did not follow this recommendation, it did not adequately explain why it chose the dispensing fee for brand name drugs based on the 40th percentile value (\$8.68) and the initial dispensing fee for generics based slightly below the 80th percentile value (\$11.89). The State's current dispensing fee of \$5.51 is one of the highest in the Nation among State Medicaid programs. The proposed dispensing fee for generic drugs would be the highest in the Nation among State Medicaid programs and would be the largest variance in dispensing fees between brand and generic drugs. Accordingly, the State failed to adequately explain why a dispensing fee slightly below the 80th percentile value would not result in most pharmacies being overpaid to dispense generic drugs. Therefore, we do not believe that the State has demonstrated why this is reasonable.

- Despite the fact that the generic dispensing fee was set at the maximum cost in the survey, the State did not adequately explain why it would further increase the generic fee above the 80th percentile to \$12.68. While the State claimed that increasing the dispensing fee would be budget neutral based on a 2.3 percent increase in the proportion of total claims dispensed as generic drugs, it did not explain why a further incentive from the current \$2 differential to a \$4 differential was reasonable.

- In response to our formal concerns, the State indicated that data do not exist to differentiate dispensing cost of brand versus generic drugs. The State indicated that the intent of the proposed dispensing fee is to encourage the use of less costly generics, and thus avoid the higher ingredient reimbursement of a brand. However, the State failed to consider the ingredient cost of

drugs as well as the cost of dispensing, to ensure that both are being paid appropriately. To increase the dispensing fee without considering the ingredient cost payment so that it accurately estimates acquisition cost results in an overall payment that is inconsistent with the requirement of the statute that payments be consistent with efficiency and economy.
