#### SUPPLEMENTARY INFORMATION:

#### I. Background

Pursuant to the savings clause in the Homeland Security Act of 2002, Public Law 107–296, Section 1512, 116 Stat. 2310 (November 25, 2002), the Department of Homeland Security (DHS) and its components and offices have relied on preexisting Privacy Act systems of records notices for the collection and maintenance of records that concern DHS contractors and consultants.

As part of its efforts to streamline and consolidate its records systems, DHS is establishing an agency-wide system of records under the Privacy Act (5 U.S.C. 552a) for these contractor and consultant records. This will ensure that all components of DHS follow the same privacy rules for collecting and maintaining contractor and consultant records. The collection and maintenance of this information will assist DHS in meeting its obligation to collect and maintain records on DHS contractors and consultants.

In accordance with the Privacy Act of 1974 and as part of the DHS's ongoing effort to review and update legacy system of record notices, DHS is giving notice that it proposes to consolidate one legacy system of records notice, DOT/CG 536 Contract and Real Property File System (65 FR 19476 April 11, 2000), as a DHS-wide system of records notice titled Department of Homeland Security Contractors and Consultants. DHS also proposes to partially consolidate one legacy record system: Treasury/USSS.001 Administrative Information System (66 FR 45362

August 28, 2001) into this Department-wide system of records. This system will allow DHS to collect and maintain records on the Department's contractors and consultants. Categories of individuals, categories of records, and the routine uses of this legacy system have been reviewed and updated to better reflect the DHS's contractor and consultant record system. This reclassified system, titled Department of Homeland Security Contractors and Consultants, will be included in DHS's inventory of record systems.

### II. Privacy Act

The Privacy Act embodies fair information principles in a statutory framework governing the means by which the United States Government collects, maintains, uses, and disseminates individuals' records. The Privacy Act applies to information that is maintained in a "system of records." A "system of records" is a group of any records under the control of an agency for which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass United States citizens and legal permanent residents. As a matter of policy, DHS extends administrative Privacy Act protections to all individuals where systems of records maintain information on U.S. citizens, lawful permanent residents, and visitors. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the type and character of each system of records that the agency maintains, and the routine uses that are contained in each system in order to make agency recordkeeping practices transparent, to notify individuals regarding the uses of their records, and to assist individuals to more easily find such files within the agency. Below is the description of the DHS Contractors and Consultants System of Records.
