

Wyoming, South Dakota, Washington, Utah, Idaho, North Dakota, Oregon, or Texas. Finally, all three categories of uranium workers must have been diagnosed with a compensable disease. For all three categories of uranium workers (miners, millers, and ore transporters), the Act specifies the following six compensable diseases: Primary cancer of the lung, fibrosis of the lung, pulmonary fibrosis, cor pulmonale related to fibrosis of the lung, silicosis, and pneumoconiosis. In addition to those compensable diseases applicable to all three categories of uranium workers, the Act specifies the following two additional compensable diseases for claimants who were employed as millers and ore transporters (but not as miners): Primary renal cancer and chronic renal disease including nephritis and kidney tubal tissue injury.

#### Statement of Policy

The issue has been raised whether claimants can combine periods of employment as a miner, miller, and ore transporter. In order to be eligible for compensation, the Act requires claimants to have been employed for one year as a miner, miller, or ore transporter. In some instances, a claimant may have worked in separate positions as a miner, miller, or ore transporter for less than one year, but the claimant's total, cumulative period of employment in these positions exceeds one year. The question is whether the Act's eligibility criteria may be satisfied by such a combination of periods of employment.

The Department is publishing this Notice to articulate its policy that claimants can combine periods of employment as miners, millers, and ore transporters to meet the one-year requirement. For all three categories of uranium workers (mining, milling, and ore transporting), the Act specifies six common diseases: Primary cancer of the lung, fibrosis of the lung, pulmonary fibrosis, cor pulmonale related to fibrosis of the lung, silicosis, and pneumoconiosis. Therefore, in cases involving those six illnesses, the Act's exposure criteria can be satisfied by combining periods of employment that include mining, milling, and ore transporting. For millers and ore transporters (but not miners), the Act specifies two additional compensable diseases: Primary renal cancer and chronic renal disease including nephritis and kidney tubal tissue injury. In cases involving those two illnesses, the Act's exposure criteria can be satisfied by combining periods of

employment that include only milling and ore transporting.

This Notice is intended to inform the public of the Department's longstanding policy regarding the calculation of the referenced employment periods. In addition, the Department will continue to announce this policy at outreach events and in communications with claimants, counsel, and support groups.

#### Submission for OMB Review: Comment Request

October 10, 2008.

The Department of Labor (DOL) hereby announces the submission of the following public information collection requests (ICRs) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (Pub. L. 104-13, 44 U.S.C. chapter 35). A copy of each ICR, with applicable supporting documentation; including among other things a description of the likely respondents, proposed frequency of response, and estimated total burden may be obtained from the RegInfo.gov Web site at <http://www.reginfo.gov/public/do/PRAMain> or by contacting Darrin King on 202-693-4129 (this is not a toll-free number) / e-mail: [DOL\\_PRA\\_PUBLIC@dol.gov](mailto:DOL_PRA_PUBLIC@dol.gov).

Interested parties are encouraged to send comments to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for the Occupational Safety and Health Administration (OSHA), Office of Management and Budget, Room 10235, Washington, DC 20503, Telephone: 202-395-7316 / Fax: 202-395-6974 (these are not toll-free numbers), E-mail: [OIRA\\_submission@omb.eop.gov](mailto:OIRA_submission@omb.eop.gov) within 30 days from the date of this publication in the **Federal Register**. In order to ensure the appropriate consideration, comments should reference the OMB Control Number (see below).

The OMB is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.
