SUPPLEMENTARY INFORMATION:**Background**

On July 15, 2008 (73 FR 40652), the FAA published a notice requesting comments on proposed changes to FAA Order 8130.2F and Advisory Circular (AC) 20-27G, as well as comments on the percentage of fabrication and assembly that must be completed by an amateur builder to obtain an experimental airworthiness certificate for an amateur-built aircraft; The comment close date of August 15, 2008 was not specifically posted in that

notice and was only available on the FAA website, also commenters requested more review time. As a result, the FAA decided to extend the comment period by 45 days to September 30, 2008. However, the reference materials (Order and AC) may have been inadvertently removed from the FAA's Web site for several days during the full 45 day comment period (August 15 until September 30). Therefore, the FAA has decided to reopen the comment period for an additional 45 days. This extension will allow the public to participate in the process and provide the FAA with more in-depth comments on the proposed changes.

Issued in Washington, DC on October 28, 2008.

Frank Paskiewicz,
Manager, Production and Airworthiness Division.

Federal Motor Carrier Safety Administration

[Docket No. FMCSA-2008-0312]

Parts and Accessories Necessary for Safe Operation; Application for an Exemption From DriveCam, Inc

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of application for exemption; request for comments.

SUMMARY: The Federal Motor Carrier Safety Administration (FMCSA) requests public comment on an application for an exemption from DriveCam, Inc. (DriveCam) to allow the placement of video event recorders at the top of the windshields on commercial motor vehicles (CMVs). The exemption would enable any motor carrier using DriveCam devices to mount the recorders lower in the windshield that is lower than what is currently permitted by the Agency's regulations in order to obtain the most effective view of the driver, passengers or outside area to maximize the ability to improve driver behavior and understand the root causes of collisions. Motor carriers would use the video event recorders to increase safety through (1) identification and remediation of risky driving behaviors such as distracted driving and drowsiness; (2) enhanced monitoring of passenger behavior; and (3) enhanced collision review and analysis. DriveCam believes this mounting position would maintain a level of safety that is equivalent to, or greater than, the level of safety achieved without the exemption.
