

II. Background

Pursuant to TSCA section 5(a)(1), any person manufacturing (including importing) a new chemical substance must file with EPA a PMN (or applicable exemption) at least 90 days prior to manufacture, unless the substance is excluded from PMN reporting. See 40 CFR part 720 regarding when reporting is required.

CNTs are considered chemical substances subject to the jurisdiction of TSCA unless and to the extent they are within the classes of materials specified in TSCA section 3(2)(B) as outside the jurisdiction of TSCA, such as pesticides, foods, drugs, and cosmetics. For example, nanoscale materials used in drugs are subject to the jurisdiction of the U.S. Food and Drug Administration.

EPA has taken steps to inform manufacturers that CNTs may require notification under TSCA section 5. EPA has made numerous public statements and responses to written inquiries indicating that CNTs are not necessarily identical to graphite or other allotropes of carbon. Manufacturers have been encouraged to submit a *bona fide* intent to manufacture or import, to submit a notice under TSCA section 5 (where required), or contact the Agency with additional questions. On July 12, 2007 (72 FR 38081) (FRL-8139-9) and January 28, 2008 (73 FR 4861) (FRL-8344-5), EPA issued **Federal Register** notices which reference a paper, TSCA Inventory Status of Nanoscale Substances—General Approach. EPA stated in that document that CNTs might not have the same molecular identity as non-nanoscale allotropes of carbon. EPA has received and is reviewing several PMNs for CNTs as new chemical substances.

Despite these efforts, current pre-notice inquiries to the Agency and questions in public forums still indicate a lack of clarity on this issue. Some of the misunderstanding may be the result of an EPA communication to a chemical manufacturer a number of years ago pertaining to a substance the Agency now considers to be a carbon nanotube material. EPA's initial response, which was specific to that inquiry and based upon the information presented at the time, was that the material was already on the TSCA Inventory. EPA has since notified that manufacturer that a PMN is required for that carbon nanotube material. Nonetheless, the Agency understands that the earlier communication may have been misunderstood by some companies as a possible indication that all CNTs may be equivalent to other allotropes of carbon for purposes of the TSCA Inventory.

This document is intended to give notice of the potential TSCA requirements applicable to CNTs. If a particular CNT is not on the TSCA Inventory, anyone who intends to manufacture or import that CNT is required to submit a PMN (or applicable exemption) under TSCA section 5 at least 90 days before commencing manufacture. Manufacturers may submit a *bona fide* intent to manufacture or import under 40 CFR 720.25 to determine whether a specific CNT is on the TSCA Inventory. Companies may also contact the Agency with specific questions. EPA strongly recommends that persons who currently manufacture CNTs for commercial purposes determine whether their CNTs are on the TSCA Inventory and in compliance with the TSCA section 5 requirements.

EPA continues to enforce TSCA consistent with its other priorities. Some time after March 1, 2009, EPA

anticipates focusing its compliance monitoring efforts to determine if companies are complying with TSCA section 5 requirements for carbon nanotubes.

If you have further questions regarding notification requirements for CNTs, consult the technical person listed under **FOR FURTHER INFORMATION CONTACT**.
