

Upon issuance of the final results of this administrative review, if any importer-specific assessment rates calculated in the final results are above *de minimis* (i.e., at or above 0.5 percent), the Department will issue appraisal instructions directly to CBP to assess antidumping duties on appropriate entries by applying the assessment rate to the entered value of the merchandise. For assessment purposes, we calculate importer-specific assessment rates for the subject merchandise by aggregating the dumping margins for all U.S. sales to each importer and dividing the amount by the total entered value of the sales to that importer. The Department intends to issue assessment instructions to CBP 15 days after the date of publication of the final results of review.

The Department clarified its "automatic assessment" regulation on May 6, 2003. See *Antidumping and Countervailing Duty Proceedings: Assessment of Antidumping Duties*, 68 FR 23954 (May 6, 2003) (*Assessment Policy Notice*). This clarification will apply to entries of subject merchandise during the POR produced by AMPL for which AMPL did not know that the merchandise it sold to the intermediary (e.g., a reseller, trading company, or exporter) was destined for the United States. In such instances, we will instruct CBP to liquidate unreviewed entries at the all-others rate if there is no rate for the intermediary involved in the transaction. See *Assessment Policy Notice* for a full discussion of this clarification.

Cash Deposit Requirements

To calculate the cash deposit rate for AMPL, we divided the total dumping margin by the total net value for AMPL's sales during the review period.

The following deposit rates will be effective upon publication of the final results of this administrative review for all shipments of wire rod from Trinidad and Tobago entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided by section 751(a)(2)(C) of the Act: (1) The cash deposit rate for AMPL will be the rate established in the final results of this review, except if the rate is less than 0.5 percent and, therefore, *de minimis*, the cash deposit rate will be zero; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent final results in which that manufacturer or exporter participated; (3) if the exporter is not a firm covered in this review, a prior review, or the original less-than-fair-

value (LTFV) investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent final results for the manufacturer of the merchandise; and, (4) if neither the exporter nor the manufacturer is a firm covered in this or any previous review conducted by the Department, the cash deposit rate will be 11.40 percent, the all-others rate established in the LTFV investigation. See *Wire Rod Orders*. These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and increase the subsequent assessment of the antidumping duties by the amount of antidumping duties reimbursed.

These preliminary results of review are issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act.

Dated: October 30, 2008.

David M. Spooner,

Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

National Estuarine Research Reserve System

AGENCY: Estuarine Reserves Division, Office of Ocean and Coastal Resource Management, National Ocean Service, National Oceanic and Atmospheric Administration, U.S. Department of Commerce.

ACTION: Notice of Public Comment Period for the Revised Management Plan for the Chesapeake Bay Virginia National Estuarine Research Reserve.

SUMMARY: Notice is hereby given that the Estuarine Reserves Division, Office of Ocean and Coastal Resource Management, National Ocean Service, National Oceanic and Atmospheric Administration (NOAA), U.S. Department of Commerce is announcing

a thirty day public comment period on the Chesapeake Bay Virginia National Estuarine Research Reserve Management Plan Revision.

Four sites along the York River comprise the Chesapeake Bay Virginia National Estuarine Research Reserve; Sweet Hall Marsh, Taskinas Creek, the Catlett Islands, and the Goodwin Islands. The four sites were designated as the Chesapeake Bay Virginia National Estuarine Research Reserve in 1991 pursuant to Section 315 of the Coastal Zone Management Act of 1972, as amended, 16 U.S.C. 1461. The reserve has been operating in partnership with the Virginia Institute of Marine Science under a management plan approved in 1991. Pursuant to 15 CFR section 921.33(c), a state must revise their management plan every five years. The submission of this plan fulfills this requirement and sets a course for successful implementation of the goals and objectives of the reserve. A boundary expansion, a revised geographic vision for the reserve, new facilities, and updated programmatic objectives are notable revisions to the 1991 approved management plan.

The revised management plan outlines the administrative structure; the education, stewardship, and research goals of the reserve; and the plans for future land acquisition and facility development to support reserve operations. This management plan describes how the strengths of the reserve will focus on four areas relevant to the Chesapeake Bay: functions and linkages of land-margin ecosystems; ecosystem vulnerability to climate and human-induced stressors; water quality and aquatic stressors; and integrated ocean observing systems.

Since 1991, the reserve has added a coastal training program that delivers science-based information to key decision makers in the Chesapeake Bay; has completed a site profile that characterizes the reserve; and has expanded the monitoring, stewardship and education programs significantly. A new administrative building (2003) and a new science and education lab (2005) have been built to support the growth of reserve programs.

With the approval of this management plan, the Chesapeake Bay Virginia National Estuarine Research Reserve will change their total acreage from 2,849 acres to a new total of 2,705 acres. This change is attributable to boundary modifications at two of the reserve sites. At Sweet Hall Marsh, 189 acres of reserve property are being removed from the reserve boundary due to a change in ownership. At the Taskinas Creek site, 44.5 acres are being added to the reserve

boundary to provide a deciduous and hardwood forest buffer to protect the estuarine areas used for research and education.

The 1991 Management Plan proposed a multi-phased expansion of the reserve that started with the four sites on the York River and planned to incorporate over 20 sites throughout Virginia to ensure adequate representation of Virginian estuarine areas important to the Chesapeake Bay. This expansion has not occurred since 1991. Due to the anticipated logistical, economic, and programmatic difficulties of having over 20 sites administered as part of the National Estuarine Research Reserve, the 2008 Management Plan focuses on the York River for the next five years.

FOR FURTHER INFORMATION CONTACT:

Michael Migliori at (301) 563-1126 or Laurie McGilvray at (301) 563-1158 of NOAA's National Ocean Service, Estuarine Reserves Division, 1305 East-West Highway, N/ORM5, 10th floor, Silver Spring, MD 20910. BILLING CODE 3510-08-P

DEPARTMENT OF DEFENSE

Department of the Air Force

Intent To Grant an Exclusive Patent License

ACTION: Notice.

SUMMARY: Pursuant to the provisions of 37 CFR 404.4, which implements Public Law 96517, as amended, the Department of the Air Force announces its intention to grant to Tribologix, Inc., an Ohio corporation, having a place of business at 7086 Corporate Way, Suite 101, Dayton, OH 45459, an exclusive or partially exclusive license in any right, title and interest, the Air Force has in the following U.S. provisional patent application:

U.S. Provisional Patent Application no. 61/123,566, entitled *Object with Durably Bonded Lubricant Layer or Other Functional Coating*, Jeffrey S. Zabinski, inventor, filed on 1 April 2008, in the USPTO.

FOR FURTHER INFORMATION: Any objection to the grant of the above license must be submitted in writing

within 15 days of the date of publication of this Notice in the **Federal Register**, to be considered.

Written response should be sent to: The Air Force Material Command Law Office, AFMC LO/JAZ, 2240 B. Street, Bldg. 11, Wright-Patterson AFB 45433-7109, attention, Thomas C. Stover. Telephone (937) 255-2838; fax (937) 255-3733.

Bao-Anh Trinh,

Air Force Federal Register Liaison Officer.

BILLING CODE 5001-05-P

DEFENSE NUCLEAR FACILITIES SAFETY BOARD

Sunshine Act Notice

AGENCY: Defense Nuclear Facilities Safety Board.

ACTION: Notice of public meeting.

SUMMARY: Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given of the Defense Nuclear Facilities Safety Board's (Board) public hearing and meeting described below. The Board will conduct a public hearing and meeting pursuant to 42 U.S.C. 2286b and invites any interested persons or groups to present any comments, technical information, or data concerning safety issues related to the matters to be considered.

Time and Date of Meeting: 9 a.m., December 5, 2008.

Place: Defense Nuclear Facilities Safety Board, Public Hearing Room, 625 Indiana Avenue, NW., Suite 300, Washington, DC 20004-2001. Additionally, as a part of the Board's E-Government initiative, the meeting will be presented live through Internet video streaming. A link to the presentation will be available on the Board's Web site (<http://www.dnfsb.gov>).

Status: Open. While the Government in the Sunshine Act does not require that the scheduled discussion be conducted in a meeting, the Board has determined that an open meeting in this specific case furthers the public interests underlying both the Sunshine Act and the Board's enabling legislation.

Matters to be Considered: This public hearing and meeting is the fourth in a series concerning the Department of Energy's (DOE) and National Nuclear Security Administration's (NNSA) incorporation of safety into the design and construction of new DOE defense nuclear facilities and into major modification of existing facilities. The Board is responsible, pursuant to its

statutory charter, to review and evaluate the content and implementation of standards relating to the design and construction of such facilities. This public hearing and meeting is a continuation of the Board's interest in integrating safety early into the design process. During the Board's initial public hearing on this subject on December 7, 2005, the Board focused on the adequacy of DOE's existing directives related to the design of new facilities. In preparation for that hearing, DOE outlined its expectations for integrating safety into design and established a framework for achieving needed improvements. During the second public hearing on July 19, 2006, the Board further explored integration of safety into design and the progress being made in implementing DOE's safety in design initiatives. During the third public hearing and meeting on March 27, 2007, the Board considered early issue identification, communication of Board issues to DOE, issue management, and early resolution and closure of design related safety issues. The third hearing also addressed the implementation status of DOE Order 413.3, *Program and Project Management for the Acquisition of Capital Assets*, DOE Standard (STD)-1189, *Integration of Safety into the Design Process*, the revision of DOE Manual 413.3-1, and lessons learned with respect to incorporating safety in design at two major Federal projects, the Waste Treatment Plant (WTP) project and the Chemistry and Metallurgy Research Replacement (CMRR) project. This fourth public hearing and meeting will consider implementation of the revised DOE Order 413.3, the related guidance contained in DOE-STD-1189, and commitments made in the July 19, 2007, joint DOE and Board report to Congress titled, *Improving the Identification and Resolution of Safety Issues During the Design and Construction of DOE Defense Nuclear Facilities*, as those commitments relate to early issue identification, communication of Board issues to DOE, issue management, and early resolution and closure of design related safety issues. This hearing and meeting is intended to further assist the Board and DOE in their collective efforts to evaluate any needed improvements in the timeliness of issue resolution. The Board again expects to hear presentations from both DOE and NNSA senior management officials concerning integration of safety into design. The Board may also collect any other information relevant to health or safety of the workers and the public, with respect to safety in design, that may
