#### SUPPLEMENTARY INFORMATION:

##### Background

GIPSA published a notice in the *Federal Register* on April 17, 2007 (72 FR 19168), inviting comments regarding the revision of the U.S. Standards for Beans to provide applicants for service with an optional grade designation for bean certification; and to remove the requirements that the percentage of high moisture and, in the case of Mixed Beans, the percentage of each class in the mixture, be shown on the grade line.

The notice provided an opportunity for interested parties to forward written comments to GIPSA until May 17, 2007. Due to a continued high level of interest in the notice, on February 1, 2008 (73 FR 6111), GIPSA reopened the comment period until April 1, 2008, to provide interested parties with additional time in which to comment.

The U.S. Standards for Beans do not appear in the Code of Federal Regulations; the U.S. Department of Agriculture maintains the standards. The process for developing or revising these standards is specified in the regulations in 7 CFR 868.102, Procedures for Establishing and Revising Grade Standards. You may view or print the U.S. Standards for Beans from the GIPSA Web site at <http://www.gipsa.usda.gov> or by contacting GIPSA by phone, fax, or e-mail using the information provided above under **FOR FURTHER INFORMATION CONTACT**.

##### Comment Review

GIPSA received one comment submitted on behalf of the U.S. Dry Bean Council (USDBC). USDBC represents the national U.S. dry bean industry, including growers, shippers, dealers, canners, and state and regional trade associations. The USDBC comment supported our proposed changes.

##### Final Action

Accordingly, GIPSA is revising the U.S. Standards for Beans to provide applicants for service with an optional grade designation for bean certification;
