SUPPLEMENTARY INFORMATION:

Background

In 1991, EPA announced that it would conduct a scientific reassessment of the potential health risks of exposure to dioxin and related compounds. EPA's Science Advisory Board (SAB) first reviewed the draft dioxin reassessment in 1995, and the document was revised to address SAB comments. In 2000, the SAB reviewed the integrated summary, risk characterization, and other information on toxic equivalency of dioxin-like compounds. Reports of the findings and recommendations of these SAB reviews are available on the SAB Web site at <http://www.epa.gov/sab> (see reports EPA-SAB-EC-95-021 and EPA-SAB-EC-01-006).

In 2003, EPA produced an external review draft of the multi-year comprehensive reassessment of dioxin exposure and human health effects (<http://cfpub.epa.gov/ncea/cfm/recordisplay.cfm?deid=87843>). This draft dioxin reassessment document, titled *Exposure and Human Health Reassessment of 2,3,7,8-Tetrachlorodibenzo-p-Dioxin (TCDD) and Related Compounds*, consisted of three parts: (1) A scientific review of information relating to sources and exposures to TCDD and other dioxins in the environment; (2) detailed reviews of scientific information on the health effects of TCDD, other dioxins, and dioxin-like compounds; and (3) an integrated summary and risk
