BILLING CODE 4000-01-P

DEPARTMENT OF ENERGY

Agency Information Collection Revision and Renewal

AGENCY: U.S. Department of Energy.

ACTION: Notice and request for comments.

SUMMARY: The Department of Energy (DOE), pursuant to the Paperwork Reduction Act of 1995, intends to revise and renew an information collection request with the Office of Management and Budget (OMB) for its Privacy Act Request Form. Revisions include: Update to agency address, clarification of instructions for respondents, and changes to the part of the form entitled "For Agency Use Only."

The Request Form is maintained in a Privacy Act system of records. Personal information is protected and disclosure is governed by provisions of the Privacy Act.

Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the

use of automated collection techniques or other forms of information technology.

DATES: Comments regarding this proposed information collection must be received on or before February 6, 2009. If you anticipate difficulty in submitting comments within that period, contact the person listed below as soon as possible.

ADDRESSES: Written comments may be sent to Verlette L. Gatlin, Deputy Director, Office of Information Resources, MA-90, 1000 Independence Avenue, SW., Washington, DC 20585 or by fax at (202) 586-0575 or e-mail at verlette.gatlin@hq.doe.gov.

FOR FURTHER INFORMATION CONTACT:

Requests for additional information or copies of the information collection instrument and instructions should be directed to Verlette L. Gatlin at the addresses listed above.

SUPPLEMENTARY INFORMATION: This information collection request contains: (1) OMB No. 1910-1700; (2) Information Collection Request Title: Privacy Act Information Request; (3) Type of Review: Revision and Renewal; (4) Purpose: Use of the form to request records from the DOE is voluntary. The information in the form is used to establish the identity of the requester and to authorize agency personnel to locate and review records in a system of records established under the Privacy Act. Submitting a signed form supplements the identification process established in the DOE regulation that implements the Privacy Act at Title 10, Code of Federal Regulations, Section 1008.4, and reduces the burden to the requester to provide copies of identifying documents pursuant to that section. Use of the form also can reduce the processing time by the agency to provide records that may be necessary for claims under the Energy Employees Occupational Illness Compensation Program Act and other employment-related compensation programs; (5) Respondents: 2,500 annually; (6) Estimated Number of Burden Hours: .25 hour per response for respondents or 625 hours annually, including the time for reviewing instructions.

Statutory Authority: The Privacy Act of 1974, Title 5, United States Code, Section 552a; the Paperwork Reduction Act of 1995, Title 44, United States Code, Section 3501, *et seq.*

Issued in Washington, DC, on November 24, 2008.

Ingrid Kolb,

Director, Office of Management.

BILLING CODE 6450-01-P

DEPARTMENT OF ENERGY

Office of Energy Efficiency and Renewable Energy

Request for Information for Photovoltaic Community Project: Fielded Photovoltaic Systems and Components Data

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Request for Information (DE-PS36-09GO39002).

SUMMARY: The Department of Energy (DOE) today gives notice of a Request for Information (RFI) to invite comment on approaches to address the need for consistently-collected reliability data of fielded photovoltaic systems, data analysis to deduce methods for assessing reliability and to improve accelerated aging tests to create predictive models, improvement in existing tests, more information on best practices for reliability and accelerated aging tests, and assessing the nature and frequency of safety-related issues (arcing, building integration aspects, and ground faults) and their relationship with long-term performance. It is clear that the foundation to address these needs is a database consisting of photovoltaic system and component reliability, as well as performance data, which are collected in a consistent manner. In addition to the database, it is necessary for DOE to collaborate with the national laboratories and others to evaluate the data, develop new or modified tests, assess safety, evaluate system and component interactions, and develop predictive models.

DOE is issuing this RFI for information and feedback from the PV community stakeholders. These include, but are not limited to, system operators and integrators, utilities, project planners, financial planners, manufacturers, third-party data-aggregation companies, universities, testing facilities, and other interested parties.

See the **SUPPLEMENTARY INFORMATION** section of this document, which provides further detail and comments requested.

DATES: Written comments must be received by 11:59 p.m. Eastern Time on December 17, 2008.

ADDRESSES: Send all responses to this RFI to PV.CommunityRFI@go.doe.gov in Microsoft Word format.

FOR FURTHER INFORMATION CONTACT:

Questions regarding the content of the RFI must be submitted through the
